is the largest patient
organization in Ukraine

CO "100 PERCENT LIFE" (hereinafter – "100% Life"),
It is known as the Charitable Organization "All-Ukrainian Network of People Living with HIV/AIDS"

Fight *for life*

— is our **mission**

Life, **persistence,**

integrity, *and creativity*

— are our *values*

This year, the world faced a new pandemic – COVID-19, which was a real challenge for all health systems. We, as the largest patient organization, had to be even more persistent, fight for the preservation of health care reforms and access to treatment, to respond quickly and confidently. I thank all members of the organization, partners, and donors, that in one of the most difficult years for Ukraine, together we were able to maintain services for HIV-positive patients.

Dmytro Sherembei,
Chairperson of the Coordination Council of the CO "100% Life"

regional branches

The network of "100% Life's" branches: *the development of regions*

The main achievement of our organization in 2020 was the adoption of the order "On the procedure of HIV testing for the population of Odesa" by the Health Department of the Odesa City Council. This order provides for the assignment of a social worker to each health care facility in Odesa.

Odesa
Charitable Organization "100 Percent Life. Odesa"
Alla Khodak, Chairperson

2020 was not an easy year, but we adapted to the new conditions and continued to fight for the 100% quality of life of our clients in every village, town, and district of Zhytomyr Oblast.

Zhytomyr
Charitable Foundation "100 Percent of Life. Zhytomyr Region"
Nataliia Nahorna, Chairperson

The quarantine restrictions caused by the spread of COVID-19 in 2020 created many obstacles in the implementation of the organization's project activities, but they were also forced to look for non-standard solutions and new ways. Thanks to the coordinated work of the entire staff of the organization, mutual support and the desire to help people in this difficult time, the activities of the organization did not stop. We managed to adapt ourselves to new conditions, reformat our activities and provide our clients with uninterrupted access to treatment and services.

Vinnitsa
Vinnytsia Regional Branch of the Charitable Organization "All-Ukrainian Network of People Living with HIV/AIDS"
Oksana Shevchuk, Chairperson

We are working in an area of armed conflict. More than 3,500 vulnerable women have received gender-sensitive assistance. The findings of our study among women using drugs were included in a shadow report to the UN committee. We have made significant progress in ensuring the sustainability of the organization through a variety of funding. At present, we can confidently say that "Club Svitlanok" does not depend on a single donor institution or organization.

Kramatorsk
Charitable Organization "Charitable Foundation 'Club Svitlanok'"
Svitlana Moroz, Chairperson

The strength of our team depends on united like-minded people, quick response, and well-established communications. The main value for me is people's lives, so at the time when the COVID-19 pandemic began, we did not stop our work for a moment. On the contrary, we have expanded our activities to meet the needs of our clients.

Zaporizhzhia
Charitable Organization "Network 100 Percent of Life. Zaporizhzhia"
Iryna Doroshenko, Chairperson

Lviv Oblast is a leader in budget advocacy: after all, our region has become among those, which allocates more funds for social services intended for patients living with HIV and tuberculosis, terminal patient, and for substitution maintenance therapy programs. This is about 3 million hryvnias a year.

Lviv
Charitable Organization "Charitable Society 'All-Ukrainian Network of People Living with HIV/AIDS. Lviv'"
Dmytro Tyhach, Chairperson

Despite the difficulties that arose in the organization during the pandemic in 2020, we managed to quickly reformat activities in all projects and areas, ensure uninterrupted service for project clients at all involved HCFs, psychologically support each employee and keep the entire team intact! Every difficult situation that the team faces, activates the efforts of the whole team, unites us, and makes us stronger. We are ready to overcome new challenges!

Dnipro
Charitable Organization "Charitable Society 'Network of 100 Percent of Life. Dnipro'"
Oleksandr Kolesnyk, Chairperson

Although, on the one hand, the pandemic has made it difficult to implement indicators that involve working directly with clients, on the other hand, it has demonstrated the strengths of our organization, including flexibility of management and a high level of crisis management. It was during the pandemic that we gained the first experience in implementing a volunteer project, organizing online events, attracting targeted in-kind assistance from businesses.

Rivne
Charitable Organization "Network 100 Percent Life. Rivne"
Yurii Lazarevych, Chairperson

The pandemic has made adjustments in all areas of our activities. But, despite all the obstacles and challenges, we have not lost our bearings - on the contrary, we have become more cohesive and focused. Thanks to the quality and professional work of the entire team, HIV-positive people had 100% access to treatment, the opportunity to protect and exercise their rights, and improved their quality of life. After going through this difficult period, we became more motivated, strong, and professional!

Kryvyi Rih
Charitable Organization "Charitable Society 'All-Ukrainian Network of People Living with HIV/AIDS. Kryvyi Rih'"
Oleksandr Kripak, Chairperson

They say that development is noticeable in moments of high tension. According to our rapid development, the Kyiv region is in endless tension. Maybe it's for the better. Firstly, there is simply no time to relax, and secondly, an uncontrollable barrage of working questions and ingenious ideas for us, like air and water, is necessary for 100% life. And everything has consequences - small steps lead to big victories!

Kyiv
Charitable Organization "100 Percent of Life. Kyiv Region"
Vitalii Tkachuk, Chairperson

2020 was a dynamic, fruitful, and important year. We managed to ensure the sustainability of services for our clients, as well as at the expense of budget funds. In the face of COVID-19, we "did not close" our door because of quarantine but, on the contrary, we were able to help all who applied. We maintained and modernized an effective system of social adaptation and reintegration of vulnerable groups.

Poltava
Charitable Organization "Light of Hope"
Roman Drozd, Chairperson

Our team is a tight fist! Everyone is in his or her place and effectively performs the role, clearly understanding the end result. It helps us stick together and move forward to new achievements! Our success means saved lives and the opportunity to look to the future with confidence.

Rubizhne
Charitable Organization "Luhansk Oblast Society 'All-Ukrainian Network of People Living with HIV/AIDS'"
Yevhen Topchaiev, Chairperson

The year 2020 was a real-time challenge for us - a pandemic, quarantine restrictions, inability to move, excessive overload of the health care system. But I have to admit: this only united our team, which opened up new abilities, new horizons for project implementation, and new talents. We ended this difficult year stronger, but we were sure that only victories and achievements would await us in the future because we proved that nothing was impossible for us.

Chernivtsi
Charitable Organization "100 Percent Life. Chernivtsi"
Vadym Velyzhanin, Chairperson

2020 was a year of ups and downs, constantly keeping us all in shape. But it was time that the efforts of everyone were accumulated: both employees of the organization and people who were not indifferent to other people's problems. The timely and coordinated actions of the organization's employees saved many lives: hundreds were tested for HIV, dozens of visits to clients and service providers were made, and all clients' needs were fixed and met.

Ivano-Frankivsk
Charitable Organization "100 Percent Life. Ivano-Frankivsk"
Tetiana Kohut, Chairperson

The biggest achievement of 2020 was the establishment of communication with local authorities. We helped hospitals and patients, city councils, and police. The year of the pandemic changed us forever - it made us stronger and wiser. We are proud to weather the storm in which we fought for the lives of our clients every day.

Sumy
Sumy Oblast Non-Governmental Organization "Club Chance"
Andrii Bukin, Chairperson

"Life is what happens to us as we make plans for the future." We have planned a lot for 2020, but, unfortunately, all this remains only in our plans. We did not lose 2020 - we just lived every day, fighting for our lives, and motivated our clients to do the same.

Uzhhorod
Charitable Organization "Zakarpattya Charitable Society of the Network of People living with HIV/AIDS"
Andrii Demianenko, Chairperson

In 2020, there were many challenges, successes, and ups, even an award in the competition "In the Focus of Good". I consider that the greatest achievement was to save lives - motivation to get tested for HIV, timely ART therapy, quality social support, qualified legal and psychological assistance, home delivery of ARVs, and support for TB patients.

Kropyvnytskyi
CO "100 Percent of Life. Kropyvnytskyi"
Yuliia Chabaniuk, Chairperson

Despite many challenges, the "100 Percent Life. Cherkasy" team managed to establish a mechanism for purchasing social services for people living with HIV and tuberculosis. For the first time in Ukraine, such services were funded by amalgamated territorial communities. Next - only go ahead!

Cherkasy
Charitable Organization "100 Percent Life. Cherkasy"
Nataliia Nesvat, Chairperson

I am very grateful to the team, which during this difficult year united and successfully overcame all the challenges at the time of the lockdown, reformatted the work, and mastered new skills. 2020 became not only a year of complexities but also a year of new achievements, victories, new decisions both about the implementation of projects and interaction with the power, society, and health care facilities. After all, everything, what we do - we do for people who faced health problems. But we will not leave them alone amid the turbulence caused by the pandemic. Every day, the team does hard and meticulous work, which has a significant result - saved destinies.

Kharkiv
Charitable Organization "Network 100 Percent Life. Kharkiv"
Sehii Dmytriiev, Chairperson

In 2020, we were able to quickly understand and reformat our work, save all services and the entire team. We are becoming "older", but we have not lost our optimism and ourselves. All people are in their places and united by one idea - to help. Our greatest achievement was the opening of the "100% Life" medical center in Chernihiv. This brings quality medical services closer to the patient, creates a competitive environment, and gives the patient a choice.

Chernihiv
Charitable Organization Chernihiv Branch of Charitable Organization "All-Ukrainian Network of People Living with HIV/AIDS"
Anzhela Moiseienko, Chairperson

The last year was difficult but filled with various activities and initiatives. Our team is united and happy - we work without a pause, solve complex problems, and our work brings us only pleasure.

Ternopil
Charitable Organization "Ternopil Charitable Society of Charitable Organization 'All-Ukrainian Network of People Living with HIV/AIDS'"
Oleh Lazar, Chairperson

Coronavirus provided an opportunity to consider life, organization, and working process as a whole. In the face of the pandemic, we have learned to live and work for the health and lives of our clients.

Khmelnytskyi
Khmelnytskyi Regional Branch of Charitable Organization "All-Ukrainian Network of People Living with HIV/AIDS"
Snizhana Strilets, Chairperson

Mykolayiv
Mykolayiv Charitable Organization "All-Ukrainian Network of People Living with HIV/AIDS"
Ihor Konovalov, Chairperson

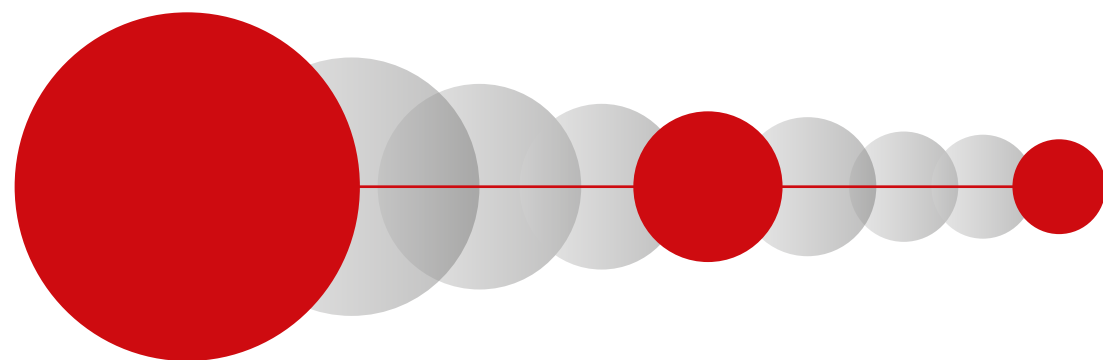

Kherson
Charitable Organization "Charitable Society '100 Percent of Life. Kherson Region'"
Tetiana Parshykova, Chairperson

Two hands, one on the left and one on the right, are shown from the wrist up. They are wearing purple sleeves. The hands are positioned so that their fingers and thumbs meet in the center, forming a heart shape. The background is a solid, vibrant red. Overlaid on the heart shape is the text 'UAH 580,972,929' in a large, white, bold, sans-serif font. Below this main text is a smaller line of text in a lighter grey color.

UAH 580,972,929

the "100% Life's" investments in the life and health of Ukrainians

Help from "100% Life"

370,689

Ukrainian received help in 2020

26,851

of them were patients with HIV+ status

22,705

of them were clients receiving ART

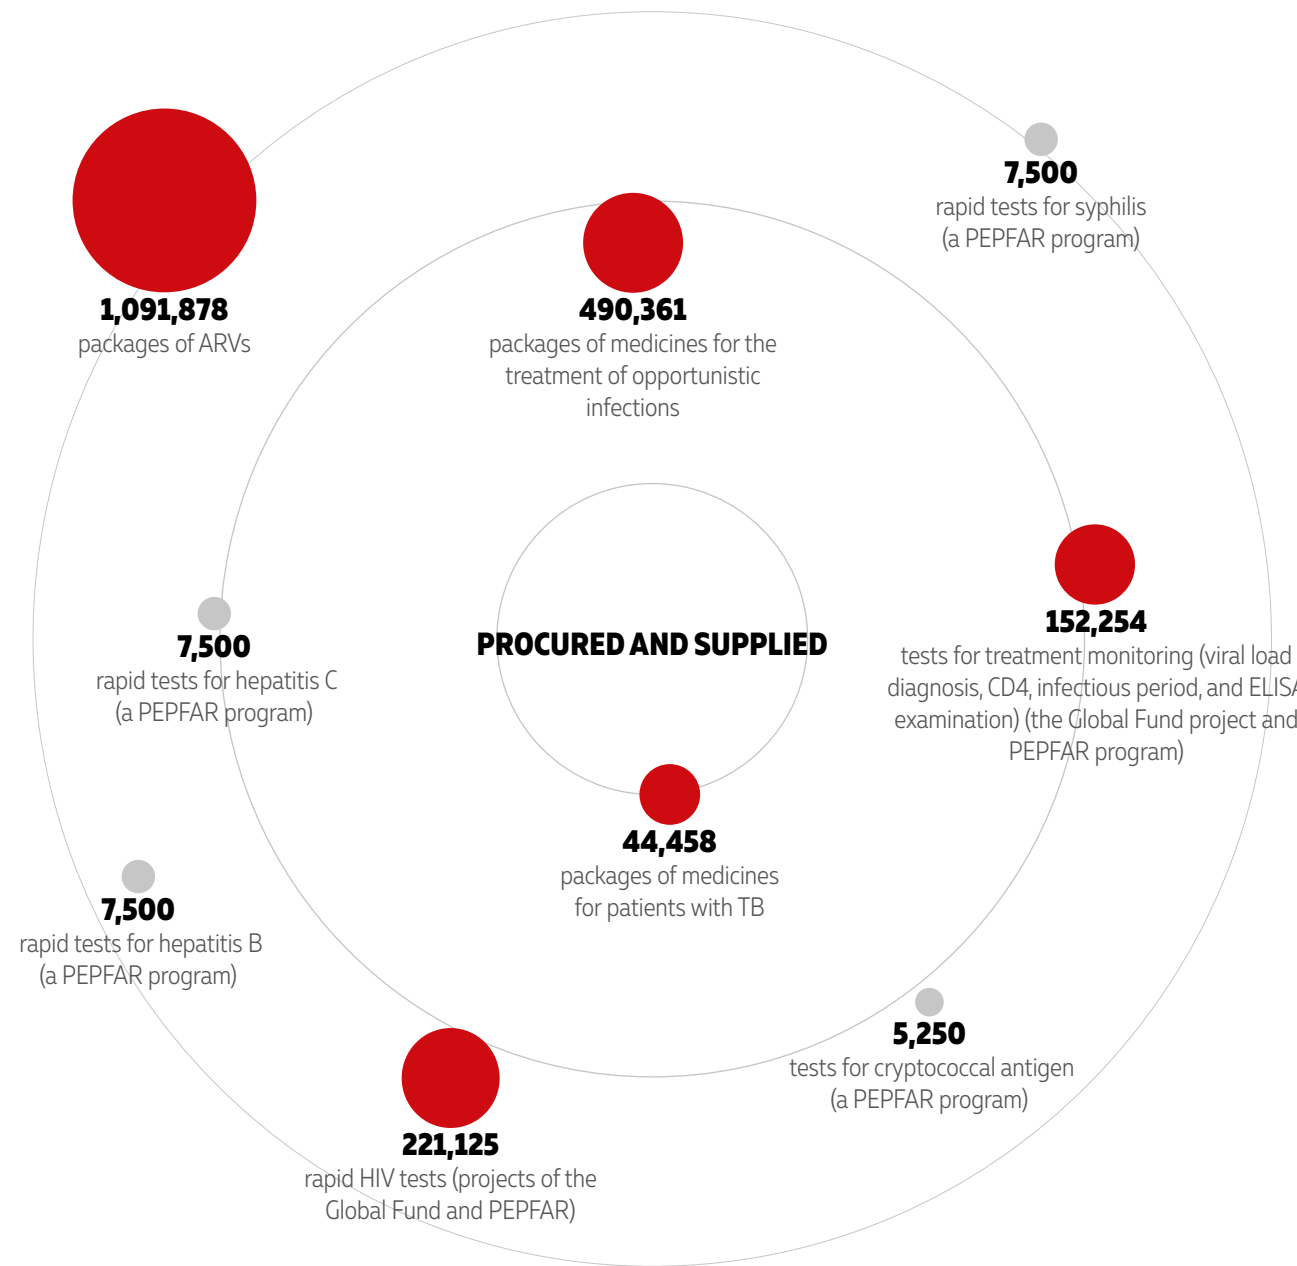

120,000

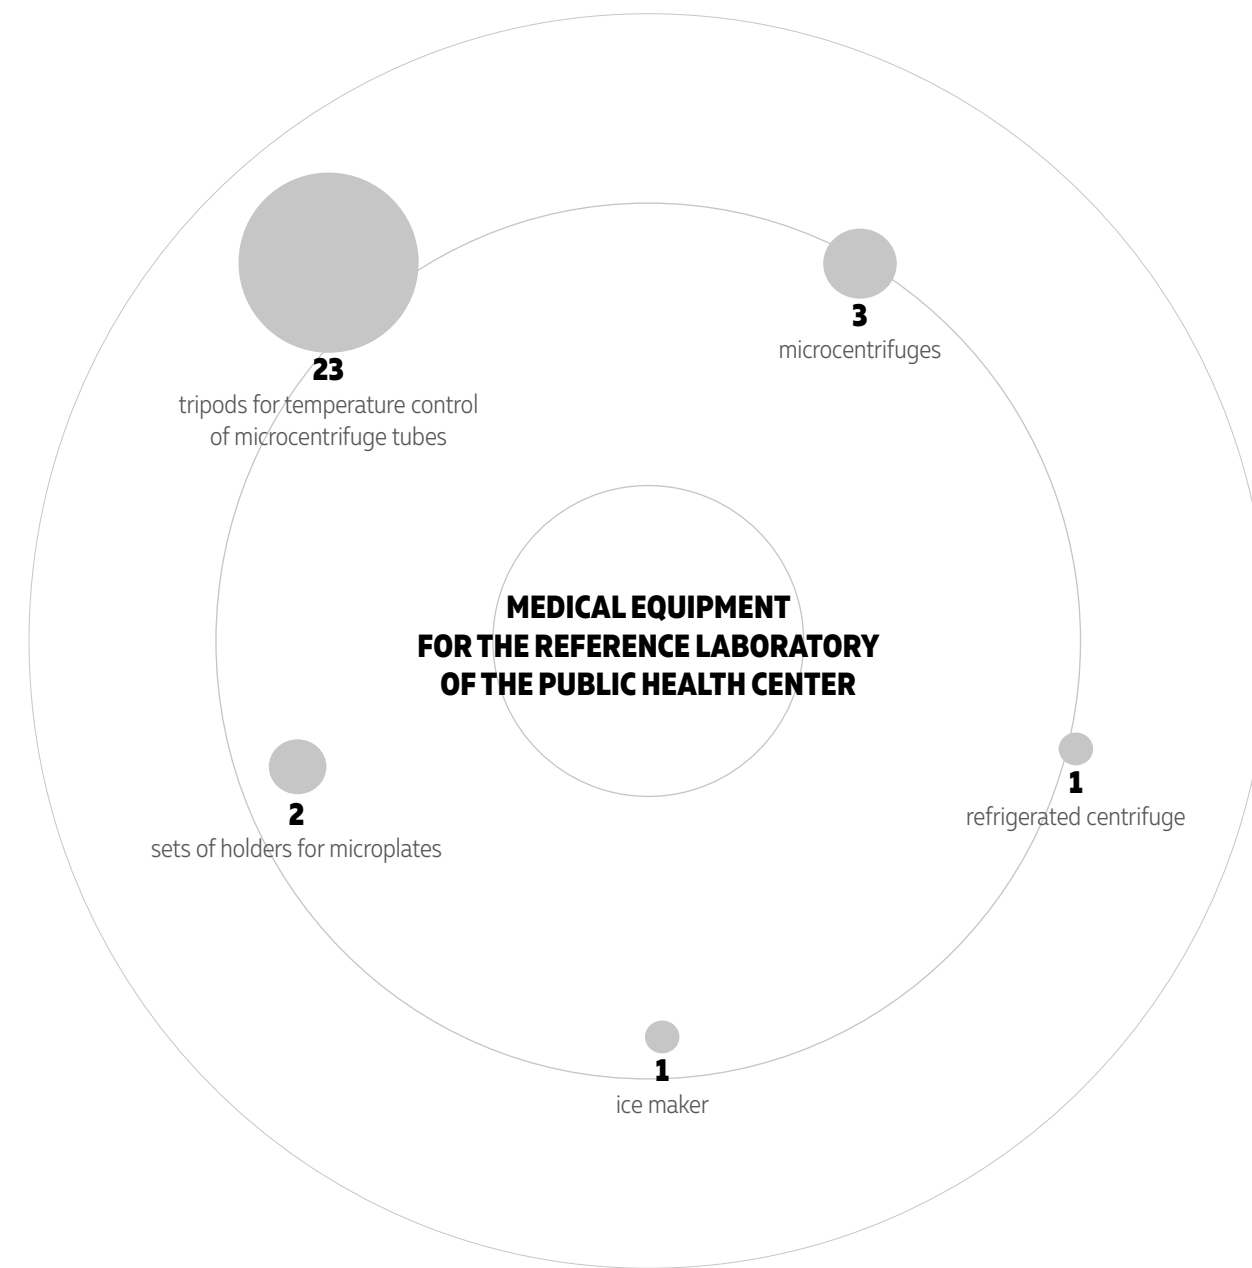

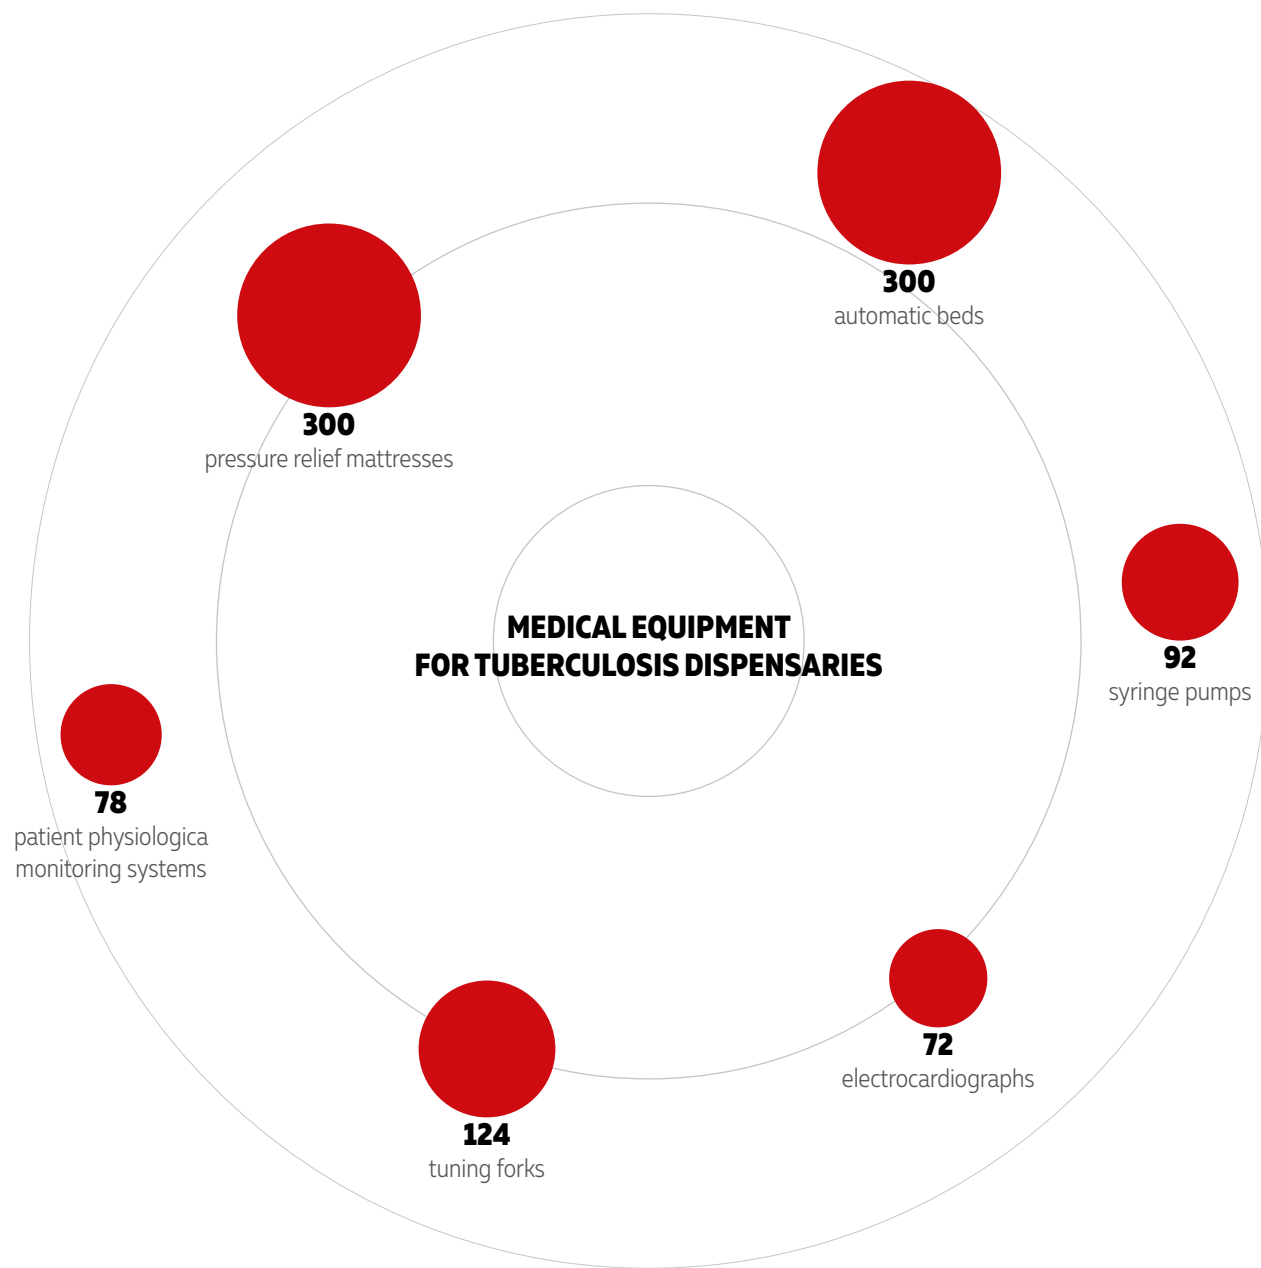

patients living with HIV received ARVs procured by "100% Life"

100%

it was of all registered adult HIV+ patients in Ukraine

Emergency procurement and supplies of medicines were caused by the failure of public procurement and the risk of treatment interruption.

Anastasia Dieieva

Executive Director of CO "100% Life"

"I am proud of the "100% Life's" team, which in this difficult year was able to quickly adapt projects to challenges of COVID-19: implemented remote solutions to provide social workers with personal protective equipment, made part of services available online and became an important partner for the state in communicating a COVID-19-related theme and purchasing medical equipment.

The team of "100% Life" is inspiring professionals!"

120,000

patients living with HIV received ARVs procured by "100% Life" (a Global Fund project), it was almost 100% of all registered adult HIV+ patients in Ukraine

PROJECT REDUCING THE TB/HIV

through universal access to timely and quality diagnosis and treatment of tuberculosis and its drug-resistant forms, expanding the evidence-based prevention, diagnosis, and treatment of HIV, and creating sustainable and resilient health systems

The project is implemented with the financial support of the Global Fund to Fight AIDS, Tuberculosis, and Malaria.

Geography – all regions of Ukraine.

Care and support services for patients living with HIV to develop their adherence to treatment, which was previously provided by CO "100% Life" with support of the Global Fund within the Transition plan from donor to budget funding, was implemented at the expense of the state in 2020.

About the Transition Plan: According to an agreement between the Global Fund and the Ukrainian Government, starting in 2019, the donor-funded HIV program began declining by increasing state funding for HIV prevention, care, and support services. The 20-50-80 co-financing plan envisages 20% funding from the state budget in 2018, 50% – in 2019, and 80% – in 2020.

HIV TESTING

Geography: Vinnytsia, Volyn, Zhytomyr, Zakarpattia, Ivano-Frankivsk, Luhansk, Lviv, Rivne, Sumy, Ternopil, Kharkiv, Khmelnytskyi, and Chernivtsi oblasts.

8,173 people were tested for HIV by rapid tests
650 cases of HIV were confirmed
627 "HIV-infection" diagnoses were determined
563 patients were registered for follow-up care (this is **89.79%** of those with confirmed HIV+ status).

The rest of the identified HIV+ clients were at the stage of diagnosis

7,95%

—
a detection rate

CARE AND SUPPORT OF PATIENTS LIVING WITH HIV

461 patients* with the disease of the highest rank of complexity received treatment, care, and support services.

59 patients received individual consultations on the treatment of opportunistic infections.

89 patients received individual consultations on the treatment of HIV/TB coinfection.

10 patients received individual consultations on the treatment of HIV/TB and viral hepatitis.

*Patients of the AIDS department at L.V. Gromashevsky Institute of Epidemiology and Infectious Diseases of the NAMS of Ukraine

SUPPORT FOR CHILDREN AND ADOLESCENTS

Geography: NDSL "OKHMATDIT", regional AIDS Centers.

283 children received medical and social support services.

6 [six] visits were arranged by multidisciplinary teams to Donetsk (Sloviansk), Kirovohrad, Poltava, Dnipropetrovsk, Mariupol, and Chernihiv AIDS Centers, and 69 clients received services within those trips.

72 healthcare specialists from the regions received remote consultations on the management of complicated cases.

PENITENTIARY SYSTEM*

Geography: Vinnytsia, Volyn, Dnipropetrovsk, Zhytomyr, Zakarpattia, Zaporizhzhia, Ivano-Frankivsk, Kyiv, Chernivtsi, Lviv, Mykolayiv, Rivne, Sumy, Ternopil, Kharkiv, Kherson, Khmelnytskyi, Chernihiv, Donetsk, and Luhansk (Government-controlled areas of Ukraine) oblasts, and Kyiv.

HIV testing

34,432 convicts were tested for HIV.

562 convicts had their HIV+ status confirmed.

2,508 index partners were tested for HIV.

221 convicts had their HIV+ status confirmed.

Treatment and support

2,958 HIV+ convicts were covered by care and support services.

954 HIV+ convicts initiated ART for the first time.

913 TB convicts received support and treatment.

91

institutions of the State Criminal-Executive Service (SCES) of Ukraine.

38,533

convicts were covered by services

PREVENTION AND MEDICO-SOCIAL SUPPORT OF TUBERCULOSIS (TB) TREATMENT

TB prevention and care, TB/HIV

Socio-psychological support of patients with TB, TB/HIV
Geography: Vinnytsia, Dnipropetrovsk, Zhytomyr, Zaporizhzhia, Ivano-Frankivsk, Kirovohrad, Luhansk, Poltava, Rivne, Sumy, Ternopil, Kharkiv, Khmelnytskyi, Cherkasy, Chernivtsi, Chernihiv regions, and Kyiv

8,205 TB patients were supported

- **3,561** patients were with drug-susceptible TB

- **4,691** patients were with multidrug-resistant TB

2,440 patients with drug-susceptible TB completed the full course of treatment

- **1,648** patients had "treatment completed" results

- **790** patients recovered

1,385 patients with multidrug-resistant TB completed the full course of treatment

- **605** patients had "treatment completed" results

- **780** patients recovered

Support for the HIV/AIDS and TB Hotline

0 800 500 451 (HIV)

0 800 503 080 (TB)

25,031 consultations by specialists of the Hotline

- **12,745** consultations (50.9%) for the general public

- **10,873** consultations (43.4%) for people living with HIV and tuberculosis

- **572** consultations (2.3%) for groups vulnerable to HIV and TB

- **451** consultations (1.8%) for medical workers

390 (1.6%) problem situations (complaints) were processed

358 (92%) were successfully resolved

100%

of patients who were in tuberculosis-designated hospitals of the SCES of Ukraine and received antituberculosis therapy.

Technical support

We prepared a complete package of design and estimate documentation for the restoration of a treatment block at Holoprystan colony 7 (Kherson region) in compliance with all modern requirements and standards of infection control for patients with TB and we submitted it to the Ministry of Justice of Ukraine.

*Clients in the penitentiary system were supported by the Global Fund to Fight AIDS, Tuberculosis, and Malaria and the For Life Project (PATH), funded by the United States Agency for International Development (USAID).

Implementation of LF-LAM tests for rapid detection of active TB in PLHIV

3,242 HIV+ patients were tested for tuberculosis.

986 patients (30.4%) received positive test results.

637 patients (64.4%) were confirmed to have tuberculosis by other methods.

586 patients (81.2%) started tuberculosis treatment.

Cooperation with the Ministry of Reintegration of the Temporarily Occupied Territories of Ukraine

On November 6, 2020, with the support of the Global Fund, CO "100% Life" equipped a service hub, consisting of a medical office and mothers-and-children room, which was opened at the new EECF "Schastia" (Luhansk Oblast). Primary care, including rapid HIV testing and a tuberculosis screening, is now available to people crossing the contact line.

In 2021, with assistance from the Global Fund, CO "100% Life" plans to start providing COVID-19 testing at the EECF.

PROJECT

"HEALTHLINK: ACCELERATING HIV/AIDS RESPONSE IN UKRAINE"

HealthLink allows getting tested for HIV quickly and safely and starting treatment.

HealthLink is implemented by CO "100% Life" in partnership with the Alliance for Public Health and with financial support from USAID (United States Agency for International Development).

About \$ 9 million has been distributed among 12 regions.

12 regions of Ukraine
Dnipropetrovsk, Donetsk, Zaporizhzhia, Kyiv, Kirovohrad, Mykolaiv, Odesa, Poltava, Kherson, Cherkasy, Chernihiv regions, and Kyiv

Efficient testing models

- Provider-initiated testing and counseling (PITC)
- HIV testing for PLHIV partners (Index Testing)
- Engaging men who have sex with men in HIV prevention, testing, and treatment services (VCT)

In Year 3:

247,310 people were tested for HIV
5,397 new cases of HIV+ status were determined
4,828 people initiated ART

- Testing was carried out at all levels of health care. Each type of institution worked according to a separate path of the patient, which allowed testing and treatment enrollment in the most effective way
- More than 300 healthcare facilities
- About 3,000 healthcare workers were trained in reducing stigma and discrimination; counseling and testing for HIV and hepatitis C using rapid tests; index testing
- About 300 social workers were involved in the project

Key approaches

- An effective approach to the selection of health care facilities (HCFs) – stop working with inefficient sites and start working with potentially significant ones
- Strengthened management of HCFs
- Implementation of a multi-testing strategy
- Expanding the strategy for disseminating oral tests
- The ongoing integration of project interventions with the reform of the health care system of Ukraine

247,310

people were tested for HIV

Half a million people
have been tested for three
years of the HealthLink
project!

ABOUT INNOVATIONS

Launch of a communication mentoring program for 27 regional partner organizations

27 NGOs developed and are implementing 27 regional communication plans within the HealthLink project to increase the demand for HIV testing services:

- A new approach to HIV communication in the regions
- Start of cooperation with a number of enterprises and opinion leaders
- Launch of online information mini-campaigns
- New digital, video, and print content

prozdorovia.in.ua

New functionality for the first Ukrainian-language website with key information about HIV and public health.

The function of ordering a free oral HIV test at home based on the results of a screening questionnaire intended to determine the risk of HIV infection has been launched.

The site also contains the largest map of testing points.

5 mln

людей охоплено інформаційними повідомленнями.

The fourth wave of the study "People Living with HIV Stigma Index in Ukraine (2020)"

The report was presented to national and international partners.

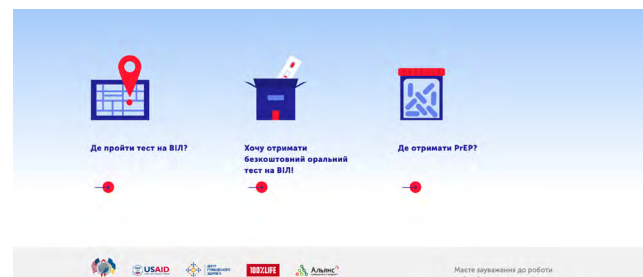

- The results indicated that in ten years the level of discrimination against people living with HIV had dropped by a factor of almost four.
- The level of self-stigma and self-discrimination among HIV patients remained a major problem

The full results of the study can be found on the "100% Life" website

Two creative digital campaigns to promote HIV testing among priority target audiences

Heterosexual men aged 35+
Men who have sex with men

- About **3,000** people were tested using oral HIV tests by placing an order on prozdorovia.in.ua
- For 3 months, about **60,000** people watched videos created for a digital campaign that invited the MSM target audience to get tested for HIV.

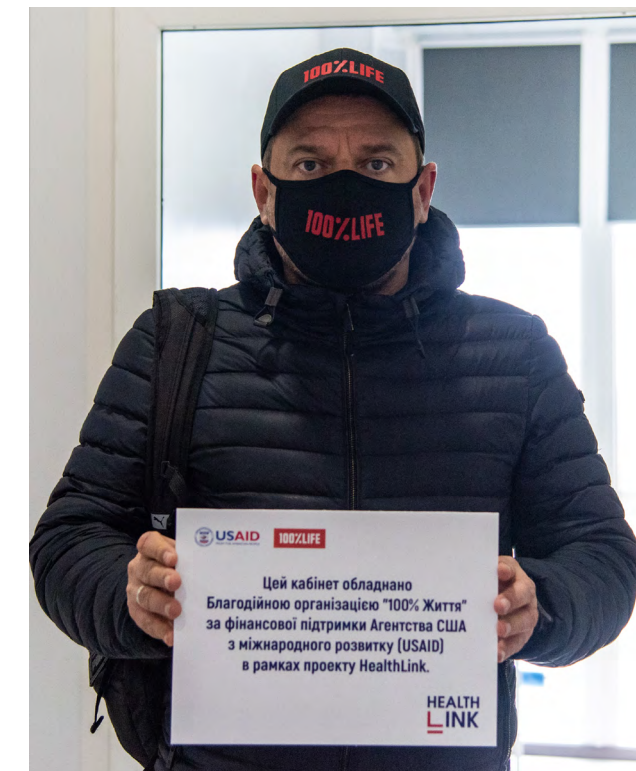

COOPERATION WITH THE MINISTRY OF REINTEGRATION OF THE TEMPORARILY OCCUPIED TERRITORIES OF UKRAINE

On December 16, 2020, a service hub with a medical office and a mothers-and-children room was opened at the EECP "Novotroitske" (Donetsk Oblast); these units were equipped by CO "100% Life" with the support of the HealthLink project.

This EECP became the second one that provided healthcare services for citizens of Ukraine crossing the contact line.

Primary care, HIV and hepatitis testing, and tuberculosis screening are available to citizens at the checkpoint. It is possible to make a declaration with a family doctor directly at the EECP and receive an appointment in accordance with the healthcare guarantee program.

"100% Life" equips service hubs at EECP in the framework of the Memorandum with the Ministry of Reintegration of the Temporarily Occupied Territories of Ukraine.

#SOS_PROJECT

PROJECT

"SUSTAINABILITY OF SERVICES FOR KEY POPULATIONS"

in consortium with the Alliance for Public Health, EKHN, and the Central Asian Network of People Living with HIV, with the financial support of the Global Fund to Fight Tuberculosis, Malaria, and HIV

535.74\$

The cost of annual treatment per 1 patient in 9 EECA countries

Ukraine, Moldova, Belarus, Russia, Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, Georgia, Bosnia and Herzegovina, Serbia, Montenegro, Northern Macedonia, and Romania.

REDUCING HUMAN RIGHTS BARRIERS AND RESISTING GENDER-BASED VIOLENCE, STIGMA, AND DISCRIMINATION AGAINST KEY POPULATIONS IN EASTERN EUROPE AND CENTRAL ASIA (EECA).

1. 8 webinars on decriminalization of HIV transmission and related human rights issues in the EECA region.
2. Strategic planning and implementation of HIV decriminalization advocacy activities in selected EECA countries and the region as a whole.
3. 52 cases of gay rights violations were documented in the target cities of the EECA region (Minsk, Almaty, Chisinau, Samarkand, St. Petersburg, Novosibirsk, Osh, and Kaliningrad) and 8 city reports were based on their results.
4. EKHN conducted a program of small grants "Gender and HIV" and 7 sub-grants implemented within this program were aimed at strengthening the capacity of members of the transgender community and their mobilization.
5. 4 national workshops (Russian Federation, Kazakhstan, Moldova, and Kyrgyzstan) on the work of national mechanisms designated to protect and promote the right to health and protect against discrimination against gays and trans* people.
6. Regional statement "Ending HIV in CEECA through Global Solidarity and Shared Responsibility" prepared by ECOM and dedicated to World AIDS Day.

Russian Federation

- Sociological survey "PLHIV Stigma Index in Russia" according to the methodology of Stigma Index 2.0.
- Under the auspices of EKHN, the 5th Eurasian Gender Academy was held and one of its online sessions was intended for representatives of the transgender community of the Russian Federation (August 6, 2020, 17 participants; August 7, 13 participants).

Republic of Belarus

- ECOM prepared and submitted a statement on the situation with the rights of gays and trans* people at the previous meeting of the UN Human Rights Council relating to the Universal Periodic Review regarding the Republic of Belarus.
- Under the auspices of EKHN, the 5th Eurasian Gender Academy was held and one of its online sessions was intended for representatives of the transgender community of the Republic of Belarus.

8

webinars on decriminalization of HIV transmission and related human rights issues in the EECA region.

Republic of Kazakhstan

- A system to monitor the observance of human rights in the penitentiary system of Kazakhstan was developed and implemented.
- Recommendations for the National Preventive Mechanism (NPM) of the Republic of Kazakhstan to achieve the 90-90-90 targets in the penitentiary system were developed.
- An interactive online school on human rights and HIV was conducted.
- EKHN held the 5th Eurasian Gender Academy and one of its online sessions was intended for representatives of the transgender community of the Republic of Kazakhstan.

Kyrgyz Republic

- EHRA prepared a report to the Special Rapporteur on Extreme Poverty and Human Rights on the criminalization of poverty through the use of disproportionate fines for drug possession for personal use.
- EHRA prepared a report on the Kyrgyz Republic and submitted it to the UN Committee against Torture.
- ECOM prepared a report on violations of the rights of trans* women in the Kyrgyz Republic and submitted it to the UN CEDAW country report.
- ECOM prepared a report on human rights violations in the Kyrgyz Republic based on SOGI and submitted it to the UN Human Rights Committee.

Republic of Moldova

- Strategic planning was started to amend the HIV-related legislation of the Republic of Moldova.
- ECOM prepared an alternative report on violations of trans* women's rights in the Republic of Moldova, submitted and presented it at a UN CEDAW meeting.

Tajikistan

- The sociological survey "PLHIV Stigma Index in Tajikistan" according to the methodology of Stigma Index 2.0 was launched.
- Under the auspices of EKHN, the 5th Eurasian Gender Academy was held and one of its online sessions was intended for representatives of the transgender community of Tajikistan.

Uzbekistan

- The sociological survey "PLHIV Stigma Index in Uzbekistan" according to the methodology of Stigma Index 2.0 was launched.
- An ECOM consultant documented 8 cases of human rights violations against LGBT people in Samarkand, Uzbekistan.

Georgia

- Under the auspices of EKHN, the 5th Eurasian Gender Academy was held and one of its online sessions was intended for representatives of the transgender community of Georgia.

REDUCING PRICES AND IMPROVING ACCESS TO ARVS IN THE EECA REGION:

1. Critical discrepancies between national protocols in the EECA countries and South-Eastern Europe (SEE) and the WHO Guidelines were identified and directions to advocate changes were formed.
2. With the participation of the patient community, new HIV clinical protocols, which are harmonized with the WHO Guidelines, were adopted in Kazakhstan, Kyrgyzstan, and the Russian Federation.
3. With the assistance of the CAA of PLHIV and in partnership with the WHO, a webinar on analyzing practical cases and problems with treatment optimization (transition to DTG, EFV 400, and use of TAF) was held for 8 EECA countries.
4. The functioning of an effective platform to advocate reducing prices and expanding access to ARVs in EECA countries was supported.
5. Voluntary license for dolutegravir was obtained in Belarus and Kazakhstan.
6. Adoption of new HIV clinical protocols in Kazakhstan, Kyrgyzstan, and Russia was advocated.
7. The indicator on the average cost of ART of the first-line treatment for the countries using the TDF + XTC + EFV regimen was performed.
8. A pool of experts was formed to monitor the effectiveness and advocate for changes in the supply of medicines for HIV treatment.
9. Advocacy for access to TDF/FTC in the pharmacy network in Kazakhstan.
10. The first regional dialogue for the SEE countries on reducing ART prices and expanding access to treatment was conducted.
11. Work on expanding access to generic DTG for 4 SEE countries began.
12. The cost of annual treatment per 1 patient in 9 EECA countries was reduced. In 2019, the cost was \$ 605.76, in 2020 - \$ 535.74.
13. The potential savings, generated by the optimization of purchase prices in 9 EECA countries, was \$ 48,987,606.84 in 2020 compared to 2019.

\$ 48,987,606.84

The potential savings, generated by the optimization of purchase prices in 9 EECA countries, in 2020 compared to 2019.

BUDGET ADVOCACY

4 webinars in partnership with the TB REP 2.0 project on the following topics:

- "Mechanisms for financing HIV and TB services from the budget funds"
- "Legal regulation of HIV and TB services. Standards and tariffs for services, their importance while transitioning towards public funding"
- "Financing of services through national insurance agencies. Current practice and prospects"
- "Assessing the quality of HIV and TB services while transitioning funding for services towards state financing systems"

5 webinars for NGOs in Kyrgyzstan, Kazakhstan, and Georgia.

- A study titled "Identified and Potential Impact of the COVID-19 Coronavirus Pandemic on the Sustainability of Funding and Implementation of HIV-Related Programs in CECA Countries" was conducted.
- The International study of state funding mechanisms for NGOs to ensure sustainability in the provision of HIV and TB prevention, care, and support services in the CECA region was conducted.

Moldova

- The CNAM prevention fund carried out a pilot procurement of HIV services amounting to MDL 750,000 from "Positive Initiative".

Georgia

- Analyses were conducted of 3 following areas: MoH's expenditures on HIV screening testing among the general population; the rationality of the MoH's expenditures on testing that confirms HIV infection; the optimization of the testing algorithm for HIV confirmation and modeling of alternative confirmation methods.
- Two studies were conducted: "Assessment of Institutional Capacities of Harm Reduction Service Providers in Transition to Result Based Funding Model"; "Possibilities and Challenges of Integration of Harm Reduction Services into Primary Health Care in Georgia".

Kazakhstan

- A roadmap related to the sustainability of services was developed.

Russian Federation

- A proposal to the Government and the Parliament on extending the law on compulsory social order to provide HIV prevention, care, and support was prepared.
- The law "On the State (Municipal) Social Order for the Provision of State (Municipal) Services in the Social Sphere" was adopted.

Belarus

- Participation in the development of the Republic of Belarus's state program for 2021-2025 "People's Health and Demographic Security".
- Participation in the revision of the MoH Resolution "On the Implementation of State Social Order".

Uzbekistan

- Participation in the development of proposals for the National Program for 2021.
- Participation in the preparation of the terms of reference for HIV services for the Parliamentary Commission for the Public Finance Management.

Tajikistan

- For calculating the cost of services, the requirements, based on which tariffs for their provision were developed, were analyzed.
- Supporting materials on state contracting procedures for civil society organizations, the specifics of participation in tenders, and reporting to the state were developed for NGOs.

PROJECT

THE GLOBAL FUND LONG-TERM CAPACITY BUILDING PROGRAMS WITH THE SUPPORT OF GNP+

The goal is to implement one of the latest and most promising initiatives to end the HIV-related criminalization, stigma, and discrimination for ever – the Global Partnership for Action to Eliminate All Forms of HIV-Related Stigma and Discrimination, created by UNAIDS, UN-Women, UNDP, and GNP+.

Geography: countries of Eastern Europe and Central Asia.
Technical and mentoring support for NGOs and government authorities of the EECA region.

WEBINARS SERIES:

- General issues of criminalization, multistigma, and discrimination
- Webinar on the Global Fund and its human rights activities
- Webinar on decriminalization with a special focus on the economic damage caused by the criminalization of HIV transmission: six separate webinars on the Global Partnership's guidelines for (1) personal, household and public, (2) workplace, (3) health-care, (4) educational, (5) justice system, (6) emergency and humanitarian settings.

Recognized experts and representatives of UN agencies provided participants with effective tools for structuring arguments in advocating for the decriminalization of HIV at the national level.

PROJECT

"100% LIFE" WITH THE SUPPORT OF AIDSFONDS

Improving access to HIV treatment by overcoming IP barriers

- Report on "evergreen" patents in Ukraine
The document used a unique methodology establishing that 45.45% of patents for medicines in Ukraine belonged to the category of "evergreen", i.e. those which issuance was not recommended by international organizations

- Patent reform in Ukraine: the Parliament approved draft law # 2259
In the medium term, this will lead to a significant reduction in drug prices in Ukraine due to increased generic competition.

PROJECT ITS "DATACHECK UKRAINE"

Information and Telecommunication System "Monitoring of Social Services Provision in Ukraine"
DATACHECK is the most accurate real-time service information management system and innovative solution for quick data verification.

DATACHECK accounts and stores the history of services provided to patients.

This is:

- Management of all service project data in one system
- All tasks and processes are in the smartphone of the social worker
- Client service quality control application
- There are three levels of use: administrator, consultant, and client
- Simplified document management system by building flexible reporting upon request

Data are:

- Correct
- Reliable
- Transparent
- Verified

The system has the Certificate of Conformity, which proves that the integrated information security system (IISS) provides information protection in accordance with the requirements of regulations on technical protection of information.

IN 2020, THE FOLLOWING MODULES WERE ADDED:

"Partners"
"Analytical Module"
"Appeals and Complaints"

Available in PlayMarket and AppStore

STATISTICS OF DATACHECK UKRAINE 2020

- 21 organizations
- 156 consultants
- 2,589 clients
- 20,375 services provided
- About 30 online training sessions were conducted with project managers, documentors, and consultants
- 3 on-site training sessions in Kropyvnytskyi, Rivne, and Zaporizhzhia

The top three organizations by a number of customers:

1. 774 clients – Charitable Organization "Light of Hope"
2. 290 clients – Charitable Organization "Network 100 Percent of Life Rivne" (in the system, since August 2020)
3. 211 clients – Khmelnytskyi Regional Branch of the Charitable Organization "All-Ukrainian Network of People Living with HIV/AIDS" (in the system, since November 2020)

The top three organizations by a number of services provided:

- 9,257 services - Charitable Organization "Light of Hope"
- 3,531 service - Sumy Oblast Non-Governmental Organization "Club 'Chance'"
- 2,476 services - Charitable Organization "Network 100 Percent Life Rivne" (since August 2020 in the system)

Most organizations working on DATACHECK UKRAINE in Donetsk Oblast:

- Charitable Organization "Charitable Foundation 'Club Svitanok'"
- Public Organization "Our Help"
- Charitable Organization "Club Maibutnie"
- Charitable Organization "Charitable Foundation 'Ukrainian Resource Center'"

Services on DATACHECK UKRAINE were provided within 5 projects:

- 49% (almost half of all clients) were clients of the project "Prozorro PHC: Various Health Services (Care and Support Services for People Living with HIV)".
- 57% of all services were provided under the project "Reducing the TB/HIV burden through universal access to timely and quality diagnosis and treatment of tuberculosis and its drug-resistant forms, expanding the evidence-based prevention, diagnosis, and treatment of HIV".
- 65% of clients confirmed their services via SMS.

ACCESS PRO

CREATING INNOVATIVE SERVICES

100%LIFE

**PROJECT
ACCESS PRO**

Access of Communities to HIV Care and Treatment through Advanced Information Systems and Better Linkage to Services - within the PEPFAR program

96,5%

the assessment of data quality in these regions in 2020

**During 2015-2017, in the framework of the previous cycle of the ACCESS project, CO "100% Life" developed the MIS HIV – the only electronic system of epidemiological and clinical monitoring of HIV prevalence. The MIS HIV was designed to create a single repository of data on epidemiological surveillance of HIV/AIDS and medical surveillance of HIV-infected persons, as well as information support for monitoring and evaluation, procurement planning, accounting, and control of the movement of medicines and medical devices.

Medical information system "HIV-Infection in Ukraine" (MIS HIV) was transferred to the Public Health Center of Ukraine**

- MIS HIV was designed to create a single repository of data from routine epidemiological surveillance of HIV/AIDS and medical monitoring of patients with HIV
- MIS HIV provided for the optimization of monitoring and evaluation processes, procurement planning, accounting, and control of medicines and medical devices

Mobile application for patients of "100% Life" was integrated with MIS HIV:

This allowed for relationships between patients and healthcare facilities by electronic registration (e-registration) in the face of the COVID-19 pandemic

- The MIS HIV functionality was supplemented with new modules "Substitution Maintenance Therapy" (SMT) and "Tuberculosis" (TB). The process of transferring MIS HIV to the national stakeholder continues
- A protocol was developed and information exchange between the MIS HIV and central database of the eHealth ecosystem was established
- The establishment of the Laboratory Information Management System (LIMS) started in 4 laboratories of the PHC and Clinical Diagnostic Laboratory of the Kyiv City AIDS Center at KCCH #5.

- Additional computer and network equipment needed to connect analyzers and perform bar-coding of biological material delivered to the laboratory was purchased.
- Training of users was carried out and the industrial version of the software was established in the reference laboratory for AIDS at the Public Health Center and the clinical-diagnostic laboratory at KCCH #5; laboratory analyzers were connected to the system.
- System adjustment and adaptation to the peculiarities of the pilot facilities took part in the reference laboratories of the PHC for microbiological and parasitological research on particularly dangerous pathogens.

HIV testing

Six regions: Dnipropetrovsk, Zaporizhzhia, Kherson, Kirovohrad, Mykolaiv, and Poltava oblasts.

103 healthcare facilities.
33,999 people were tested for HIV.
861 newly diagnosed HIV patients:
838 patients were registered for follow-up care
728 patients initiated ART

MIS HIV data quality assessment:

- It was carried out by comparing the MIS HIV and the patient card through a special tool using a random sample of cards
- 14 consultants during the year in 12 PEPFAR regions
- 278 inspections in 234 facilities: 70 - primary, 174 - secondary, 33 - tertiary, and 1 - quarterly
- About 180,000 outpatient cards were checked for data compliance

Consultancy support of the HIV/AIDS Hotline:

- Regarding testing points with a focus on index testing
- Strengthening the motivation of index clients to refer their sexual or injecting partners to HIV testing points
- Referral to organizations and facilities specialized in combating all forms of violence
- Methods of anonymous notification of various forms of violence by intimate partners or testing service providers
- Points and algorithms of PrEP, features of taking and side effects
- Collection of information about persons interested in taking PrEP
- Regarding the terms for which ART is given or restrictions on their use
 - 155 consultations on index testing (plan - 150)
 - 128 consultations on PrEP (plan - 100)
 - 67 consultations on appeals to reduce the length of ART dispensing intervals (plan - 10)

Support of the Public Health Center:

- The line of national technical support of the MIS HIV was strengthened and a network of national system administrators was created
- A draft order on industrial use was prepared and submitted to the MOH for approval
- A draft order on modernization of the MIS HIV was prepared and submitted to the MOH for approval
- MIS HIV system was fully operational, the administration of server equipment in the leased cloud storage was provided
- Technical support for MIS HIV users was provided in full
- Pilot launch and testing of the module "Substitution Maintenance Therapy" were conducted
- Connecting websites and maintaining patient cards after piloting

PROJECT

"100% LIFE" AND THE UKRAINIAN HELSINKI HUMAN RIGHTS UNION

Creating a Legal Network to Protect the Rights of People Living with HIV/AIDS, Representatives of Key PLHIV Communities and People with Tuberculosis

2,862

Ukrainians received qualified legal assistance

Support of legal cases

- 124 pre-trial cases
- 84% of cases were resolved in favor of clients (2% of cases were lost, 14% were terminated due to refusal or death of clients)
- 39 strategic cases
- 10 cases in the European Court of Human Rights

IT solutions

- It provided access to qualified free legal aid to people living with HIV, the population vulnerable to HIV infection, and patients with TB
- During quarantine restrictions due to COVID-19, the chatbot became another platform for operative remote consulting of clients
- The chatbot operated on Facebook Messenger, Viber, Telegram, and on the sites of "100% Life" and the UHHRU.

Legislative, analytical, and advocacy activities

- Amendments to the Law of Ukraine "On Lease of State and Communal Property" were developed to facilitate the provision of services to people from groups at high risk for HIV, as well as to people living with HIV, tuberculosis, and viral hepatitis.
- The final report based on public monitoring of the National Human Rights Strategy was developed. The implementation of the strategy for the last

5-year period was analyzed and proposals on the priorities of a new Plan for the next 2-3 years were made. This was the starting point for official work on amending Ukrainian human rights legislation.

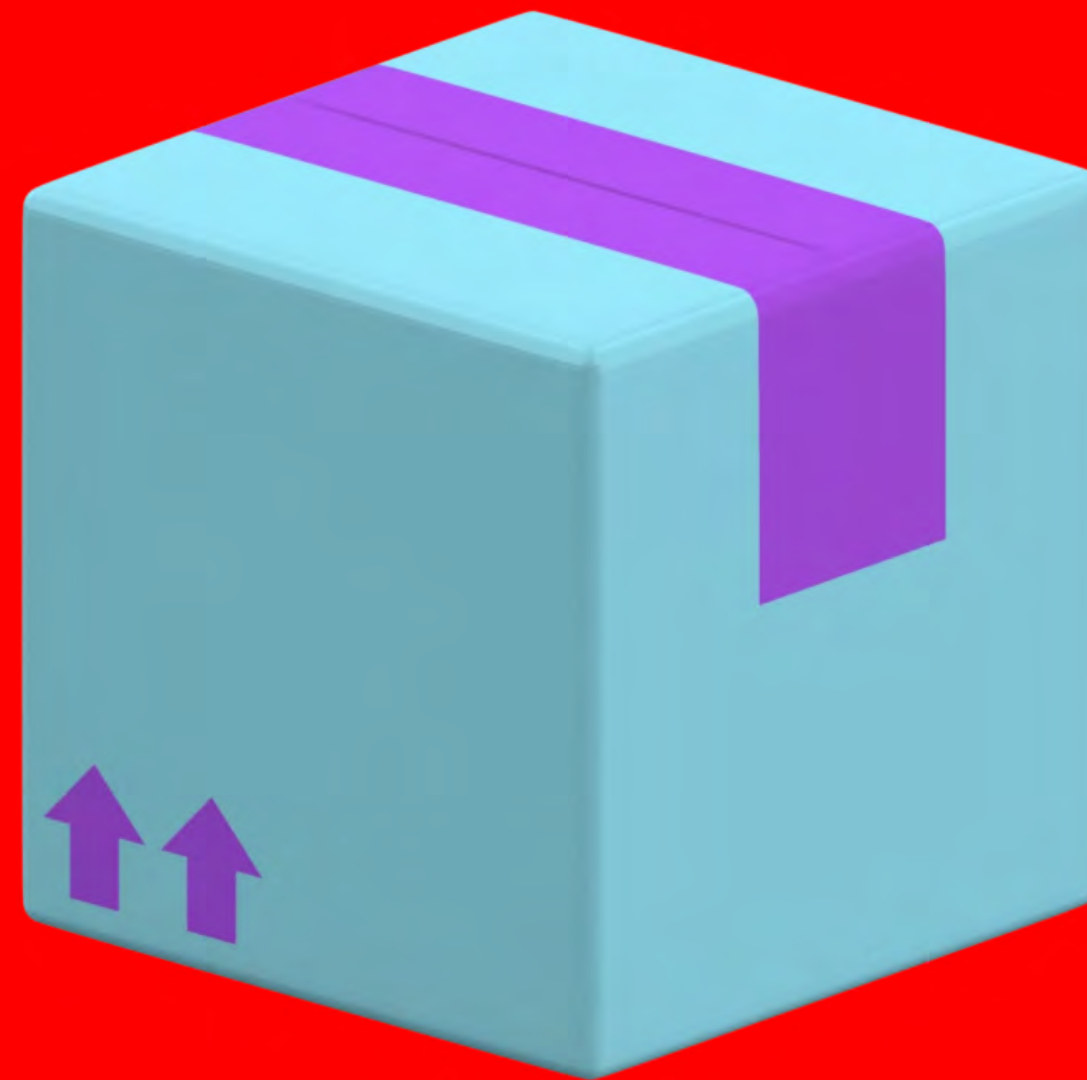

- For further international advocacy activities aimed to protect the rights of PLHIV and representatives of key communities vulnerable to HIV, an application was submitted to the Committee of Ministers of the Council of Europe containing a shadow report on Ukraine's implementation of the ECHR decisions regarding cases related to failure to provide timely and quality health care to HIV-positive prisoners and detainees.
- "Training of trainers on the development and implementation of educational programs on the dissemination of information on rights and protection methods for members of target communities": four online events.

27,781

appeals to the special legal chatbot "Legal bot 100% LIFE"

20,603

deliveries for 16,479 HIV-positive Ukrainians were made by social workers in March-May 2020

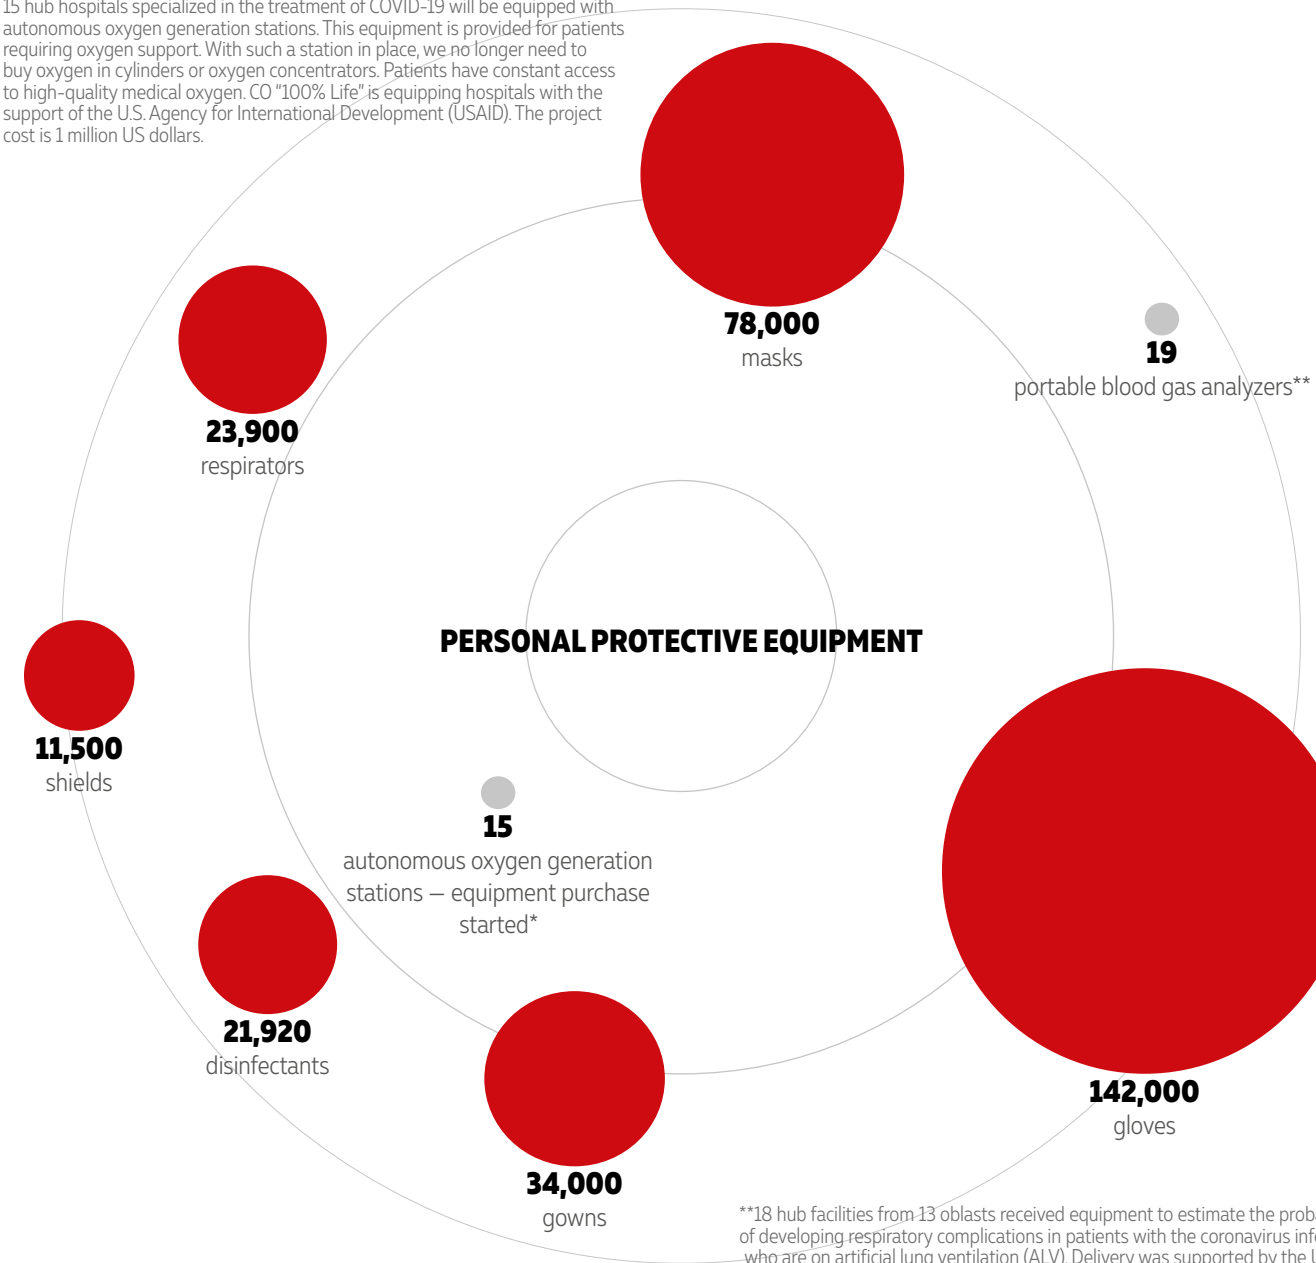

Responding to COVID-19

Portable blood gas analyzers

15 hub hospitals specialized in the treatment of COVID-19 will be equipped with autonomous oxygen generation stations. This equipment is provided for patients requiring oxygen support. With such a station in place, we no longer need to buy oxygen in cylinders or oxygen concentrators. Patients have constant access to high-quality medical oxygen. CO "100% Life" is equipping hospitals with the support of the U.S. Agency for International Development (USAID). The project cost is 1 million US dollars.

**18 hub facilities from 13 oblasts received equipment to estimate the probability of developing respiratory complications in patients with the coronavirus infection who are on artificial lung ventilation (ALV). Delivery was supported by the USAID HealthLink project.

RESPONDING TO COVID-19 CHALLENGES IN THE FRAMEWORK OF "100% LIFE'S" PROJECTS

Delivery of ART for HIV-positive patients in different ways: postal, home by social workers, etc.

- With the start of quarantine restrictions in March, dozens of HIV patients faced the problem of receiving ART due to transport restrictions
- 20,603 deliveries for 16,479 HIV-positive Ukrainians were made by social workers in March-May 2020

Individual protection for social workers

- Possibility of redistribution of sub-grant funds in the regions in the Global Fund's projects and the PEPFAR program for the purchase of personal protective equipment (PPE)
- Centralized purchasing of PPE for social workers

Adaptation of approaches to testing and social support in the conditions of quarantine restrictions

- Medical and social support at home (a doctor, a social worker, psychologist consultations; routine HIV diagnosis; COVID-19 testing)
- Consultations on various aspects of treatment and psychological support with clients (including convicts and prisoners) online, by phone, and through Viber
- Promoting the distribution of the oral tests through prozdorovia.in.ua for self-testing at home
- Use of the MIS HIV system to plan visits of HIV-positive patients to infectious disease doctors if necessary. Using the "100% Life's" application as a communication channel with patients to disseminate up-to-date information about COVID-19
- Delivery of motivational kits (food, hygiene) for convicts and prisoners
- Transportation of biological materials from prison facilities to laboratories of the MOH and other regional penitentiary institutions

Operational solutions

- Online supervision for social workers
- Online training courses for medical workers involved in the "100% Life" projects

New initiatives

- Organization of testing for COVID-19 along the contact line in some districts of Donetsk and Luhansk oblasts
- Purchase of medical equipment to respond to COVID-19 at the request of the state: blood gas analyzers, laboratory equipment, oxygen stations, etc.
- Information materials on COVID-19 for patients living with HIV, tuberculosis, and the general population

Emergency purchase of ARVs to prevent discontinuation of HIV treatment in Ukraine

84,000

PCR tests for COVID-19 purchase

HIV **EPIDEMIC
WILL BE STOPPED
COMMUNITIES**

Community Development

INVESTING ***IN CAPACITY*** **BUILDING** AND *INSTITUTIONAL* *DEVELOPMENT* = **STRONG** **COMMUNITIES**

MEN WHO HAVE SEX WITH MEN (MSM)

Advocacy achievements of the community:

- The draft law "On Civil Partnership" is included in the Action Plan for the implementation of the National Human Rights Strategy for 2021–2023. The Ministry of Justice of Ukraine assumed responsibility for the implementation of this task.
- In July 2020, Ukraine received a direct recommendation from the UN to implement the institution of registered civil partnership ("Report of the Independent Expert on Protection against Violence and Discrimination Based on Sexual Orientation and Gender Identity" was presented at the 44th session of the UN Human Rights Council).
- The draft law of Ukraine "On Amendments to the Criminal Code of Ukraine (regarding the regulation of liability for crimes committed on the grounds of intolerance)" was submitted to the Verkhovna Rada for consideration.
- For the first time in the history of Ukraine, the national TV channel was deprived of its license due to homophobia (indicating this fact in official documents).
- 130 new volunteers joined the paralegal network.

SEX WORKERS (SWS)

- During the COVID-19 pandemic, the community raised additional funds to provide psychological and material assistance to sex workers.
- 320 sex workers participated in information sessions to mobilize efforts to advocate for community interests and raise awareness of health and human rights protection.
- 3872 law enforcement officers participated in informational and educational sessions on reducing the level of stigma and discrimination against sex workers and representatives of other key populations.

ADOLESCENTS LIVING WITH HIV

- Changes to "Standard Regulations on the Center for HIV-Positive Children and Youth" (to the Resolution of the Cabinet of Ministers of Ukraine "On Approval of Standard Regulations on Social Support Institutions for Families, Children, and Youth" #741 of October 4, 2017) were proposed. The proposals were considered by representatives of the Ministry of Social Policy, and they will be implemented during the improvement of the regulatory framework for the provision of social services in 2021.
- 673 adolescents were trained in reproductive and sexual health.

TB COMMUNITY (PEOPLE AFFECTED BY TB)

- The allocation of local budgets for social support of patients with tuberculosis in the total amount of almost UAH 500,000 was advocated in 7 regions.
- In Cherkasy oblast, UAH 20,400,000 from the local budget was advocated to support the TB service for the period of its reform.
- The creation of the Expert Group on Tuberculosis, including on barriers and violations of the rights of people affected by TB, was advocated.
- 4 trips to the regions were made to address complaints about the observance of the rights of patients with TB
- 560 people from 12 oblasts took part in activities aimed to increase adherence of TB patients to treatment.
- Amendments to the Law of Ukraine "On Combating Tuberculosis" were prepared.
- The working subgroup on tuberculosis was supported within the activities of the Strategic Working Group on Sustainability of Services in Response to HIV/AIDS and TB within the transition to public funding.
- For the first time in Ukraine, the National Dialogue event was conducted to join efforts of state institutions and civil society organizations affected by tuberculosis to access quality healthcare and social services with respect for human rights within the transition from donor to state funding.
- As a result of the dialogue, cooperation with the Ministry of Social Policy was established; recommendations for regulations on tuberculosis were prepared.
- Due to delays in the supply of anti-TB drugs, advocacy work was carried out and interruptions of treatment were prevented in Volyn and Ivano-Frankivsk oblasts.
- In 2020, 3 more representatives of TBpeopleUkraine joined the hospital councils in 3 regions of the project. (At the end of 2019, representatives of TBpeopleUkraine have already joined the majority of regional or city coordination TB and HIV councils).
- By World TB Day, a number of public actions, appearances on TV, and photo exhibitions were held in the regions; social advertising was placed in the Kyiv subway.

FORMER PRISONERS

- An effective response to the challenges caused by the COVID-19 pandemic: 101 former prisoners from 17 oblasts were supported during enhanced quarantine.
- An advocacy campaign was conducted to include employees of penitentiary institutions and pre-trial detention centers, as well as convicts and prisoners, in the priority groups for vaccination against COVID-19.
- Social workers from among convicts in 55 penitentiary institutions of Ukraine were trained.
- The "FREE LIFE" application was developed for convicts and released from penitentiary institutions, remand detainees, those on probation, as well as for doctors of penitentiary institutions of Ukraine, inspectors preparing for release, employees of authorized probation bodies and social patronage services, representatives of non-governmental organizations, government, and local authorities. The "FREE LIFE" application helps to apply the latest digital technologies to resocialize convicts.

The community of former prisoners developed and advocated for amendments to regulations: Instruction on working conditions and wages of convicts sentenced to restriction of liberty or deprivation of liberty; proposals were made to the draft resolution of the Cabinet of Ministers to provide substitution maintenance therapy for people with mental and behavioral disabilities as the result of opioid use.

PEOPLE WHO INJECT DRUGS (PWID)

- Due to the efforts of the PWID community, the risks of substitution maintenance therapy interruption were prevented. Crown Agents purchased Methadone tablets amounting to UAH 9 million for 8,125 patients (funds were saved on purchases).
- UAH 80,000 was raised (through budget advocacy) from the budget of Lviv to provide social services to clients of the substitution maintenance therapy program.
- The strategic community development plan for 5 years was developed.
- Funds were raised for the opening of two new SMT sites in the Lviv region: Mykolayiv and Novoyarivsk.
- Patients have been waiting for years for the opportunity to receive medicine in their cities.
- The sites were provided with modern equipment and furniture.
- Approval of the State Standard of Social Services for Social and Psychological Rehabilitation of Persons with Addiction to Narcotic Drugs or Psychotropic Substances was advocated.
- More than 120 cases on violations of the rights of the PWID community were documented.
- The community was forced to repeal a discriminatory and unconstitutional draft law #2784, which proposed the introduction of involuntary treatment and the de-facto blocking of the market for painkillers or drugs for substitution maintenance therapy.

WOMEN LIVING WITH HIV

- The community raised additional funding from the local budgets of Dnipropetrovsk, Chernihiv, and Cherkasy oblasts to protect the rights and improve the quality of life for women living with HIV.
- CO "Positive Women" conducted a gender audit of the National Strategy on HIV/AIDS, Tuberculosis, and Hepatitis until 2030.
- An analytical report on monitoring cases of gender-based violence with recommendations was published.
- In November-December 2020, CO "Positive Women" conducted the campaign "There is no excuse for violence! - 2020" in 20 regions of Ukraine.
- CO "Positive Women" expanded its geographic reach into 3 more regions of Ukraine.

UAH 100 MLN

from the state budget was saved

Advocacy for Access to Treatment

THE PRICE WAS REDUCED BY
3 TIMES TO DARUNAVIR

**"100% LIFE" WAS THE FIRST IN THE EECA
REGION TO APPEAL AGAINST A PATENT FOR
BEDAQUILINE**

HIV TREATMENT

● Darunavir (600mg)

The price was reduced by **3 times**

From UAH 202*** to UAH 68***

Because a generic version of the drug entered the market of Ukraine
***According to the official exchange rate of Ukrainian Hryvnia to US Dollar (average for 2020)

● Lopinavir/Ritonavir

Patent was revoked

It is expected that the price of the drug will be reduced by 3 times in 2021

TB TREATMENT

"100% Life" was the first in the EECA region to appeal against a patent for bedaquiline.

- An application regarding the inclusion of the rifapentin/isoniazid combination in the nomenclature of anti-tuberculosis drugs was prepared and submitted to the MOH.

This will allow the implementation of modern regimens for the prevention of latent tuberculosis infection in the country. The application was approved by the expert group at the MOH and the inclusion of the drug in the state nomenclature was planned for January 2021 (the drug was included).

- At the expense of the State Budget for 2020, for the first time, Ukraine purchased the combination of tenofovir/lamivudine/efavirenz 400 mg (EFV400) instead of the combination with efavirenz in a dosage of 600 mg.

The WHO recommends combination with EFV400 as an alternative treatment for HIV. "100% Life" advocated for the inclusion of the drug in the nomenclature for purchasing in 2019.

- The intervention of the "100% Life's" experts managed to accelerate the supply of levofloxacin for the treatment of patients with drug-resistant tuberculosis and minimized the risk of treatment interruption.

Experts of "100% Life" work in the MOH expert groups on the purchase of drugs for the treatment of TB, HIV, hepatitis B and C, as well as in the group on the purchase of substitution therapy for PWUD.

- UAH 100 million from the state budget was saved. Thanks to the advocacy work of "100% Life", the TB drug bedaquiline was purchased from the Global Drug Facility.

THE GLOBAL FUND SUPPORTED A STUDY ON THE IMPACT OF TRIPS+ PROVISIONS ON ACCESS TO MEDICINES.

- A unique methodology was used
- The negative impact on drug pricing was analyzed: data exclusivity, patent linkage, and the mode of patent term extensions

Reduction of prices for ARV medicines and challenging patents for the medicines is supported by ITPC Global (UNITAID)

Activities of "100% Life"
to minimize risks during the Transition Plan in 2020

07/ Transition Plan from Donor to State Funding

SINCE JULY 1, 2019, FUNDING FOR HIV PREVENTION, CARE, AND SUPPORT SERVICES HAS BEEN PROVIDED BY THE STATE BUDGET.

According to an agreement between the Global Fund and the Ukrainian government, since 2019, donor funding for the HIV program has begun declining in favor of increased public funding for HIV prevention, care, and support services. The 20-50-80 co-financing plan envisages 20% financing from the State Budget in 2018, 50% - in 2019, and 80% - in 2020.

Since July 1, 2019, funding for HIV prevention, care, and support services has been provided by the State Budget. The implementation mechanism was services procurement through the ProZorro e-procurement system.

The State procured services through tender procedures. The vast majority of service providers selected as winners were NGOs.

ACTIVITIES OF "100% LIFE" TO MINIMIZE RISKS DURING THE TRANSITION PLAN IN 2020:

- A "100% Life's" sub-grantee, CO "Light of Hope", implemented final activities during the year to strengthen the role of local executive authorities in implementing measures to combat the HIV epidemic.
- Project experts and a budget advocacy consultant provided technical support for the implementation of advocacy initiatives in Khmelnytskyi, Rivne, Mykolaiv, Cherkasy, Kharkiv, Chernihiv, Kirovohrad, and Dnipropetrovsk (Kryvyi Rih) oblasts. In particular, they provided consultations with representatives of local executive authorities on the implementation of an expanded package of services in 2020 at the expense of local sources.
- Five round tables were held on the common subjects of providing the needs of people living with HIV, quality healthcare and social services, and the principles of cooperation between NGOs and local authorities. There was an exchange of best practices.
- The following three advocacy cases were implemented:
 1. "Provision of social services to patients receiving SMT", the Rivne region (UAH 49,593, The customer was ME "Rivne Regional Mental Health Center", The provider was CO "Network 100 Percent Life. Rivne")
 2. "Prevention services for minors and young people in Kupyansk", the Kharkiv region

(UAH 49,961.04, The customer was The Center of Social Services for Families, Children, and Youth of the Kupyansk City Council, The provider was HCF "Parus")

3. "Social support for patients living with TB, as well as HIV", the Cherkasy region (UAH 20,000, The customer was MNE "Kaniv primary center of medical and social support", The provider was CO "100 Percent Life. Cherkasy")

- The analysis of the legal framework on public health was carried out and the additional analytical report on the possibility to amend legislation based on the current situation was developed
- Active consultative work with the PHC experts was conducted, revision of tariffs for services for PLHIV was initiated

133 170 000

medical records were created in the system in 2020 in eHealth

Transformation of the Health System of Ukraine

30,900,000

patients were registered with eHealth

DEVELOPMENT OF THE INTEGRATED PROCESS AUTOMATION SYSTEM OF THE NATIONAL HEALTH SERVICE OF UKRAINE (THE IS NHSU) HAS STARTED

- The purpose of the IS NHSU development is to ensure the implementation of the NHSU functions related to the implementation of state policy in the sphere of state financial guarantees of public health services
- The IS NHSU will consist of modules that automate the processes of concluding and executing contracts in the framework of healthcare reform, data analysis, generation of analytical and financial reports, and exchange of information between users

The Integrated System of the National Health Service of Ukraine was developed in the framework of the project "Supporting eHealth Infrastructure Development in Ukraine" with financial support from the United States Agency for International Development (USAID).

The reform of primary, secondary, and tertiary health care continues.

SUPPORT OF THE EHEALTH SYSTEM

In the eHealth system

- 30,900,000 patients were registered with eHealth
- 23,489 primary care physicians
- More than 6,000 healthcare facilities provided services at all levels of health care
- More than 133,170,000 medical records were created in the system in 2020

The central database of the e-health system has been expanding

- The "Immunization" module was developed.
- Immunization information will be stored in a format convenient for both physician and patient, in compliance with international standards for the storage of such data.
- The work on the "Logistics Management Information System" (LMIS) module was started
- It will be used to track the logistics of medicines and medical supplies
- With the support of the Global Fund and in cooperation with SE "Electronic Health", in 2020 the MOH started the development of technical documentation, including the Terms of Reference for LMIS, as well as expanding the functionality of electronic prescriptions for patients. The necessary software was purchased for SE "Electronic Health" to track activities and tasks for the development of the Terms of Reference for LMIS.

Current eHealth data is available at <https://nszu.gov.ua/e-data/dashboard>

THE "CENTRAL 103" SYSTEM

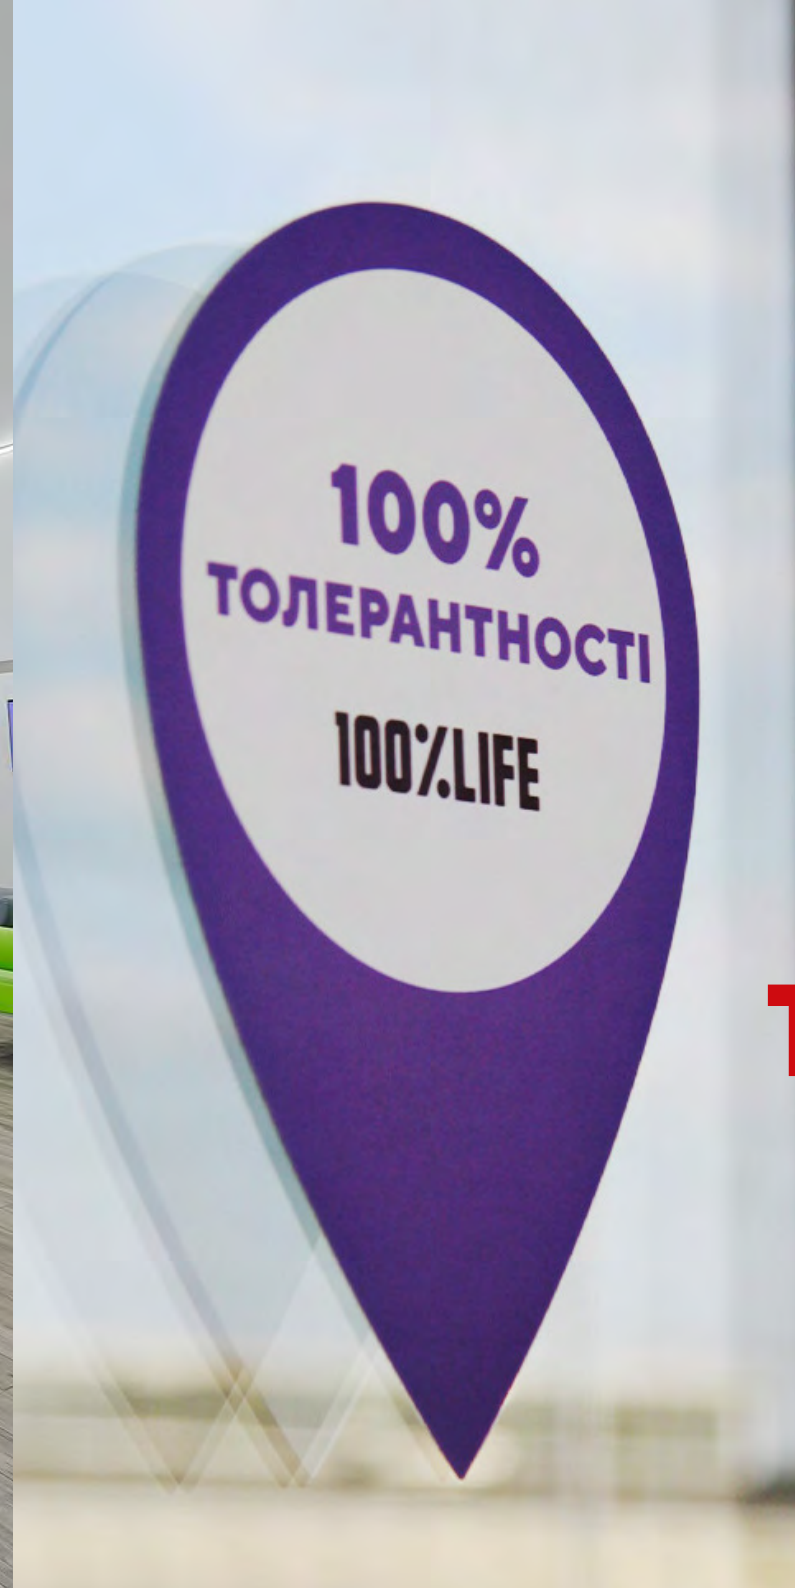

Central 103 is a national IT system that controls the quality of emergency medical care (EMC) and accelerates the arrival of first responders and EMC crews.

Central 103 is one of the components of the eHealth ecosystem and it provides digitalization of the entire EMC sector.

In 2020**

- The functionality of the Central 103 ecosystem, which interacted in both directions with the central database of the eHealth ecosystem, was updated.
- The analytical "Central 103" module was created.
- Three regional dispatching services were connected to Central 103, which allowed achieving the total number of connections - 23 regions of Ukraine.
- An ARI tool was developed to link primary responders to the Central 103 ecosystem.

** The Swiss Cooperation Office made the improvement of Central 103 in 2020

PRINCIPLE
OUR WORKS:
**«100%
TOLERANCE»**

"100% Life" Medical Centers

Four "100% Life" Medical Centers operate in Kyiv, Poltava, Chernihiv, and Rivne.

ABOUT MEDICAL CENTERS:

- The medical centers provided services to both general population patients and members of the community of people living with HIV, as well as representatives of at-risk groups.
- The centers were inclusive and open to all. The principle of our work is "100% tolerance"
- By signing an agreement with the MOH, the centers became part of the state healthcare system in 2018
- The medical centers provided the following services:
 - Family medicine
 - Vaccination
 - Specialized health care
 - SMT
 - Diagnostic services, including HIV testing
- All four medical centers were provided with vaccines purchased from the state budget for vaccinations according to the National Vaccination Calendar. Additional recommended vaccines offered to customers on a commercial basis were also available.
- On April 2, 2020, a contract was signed with the NHSU to provide health care under the program of healthcare guarantees: treatment of patients living with HIV
- In 2020, the list of services provided in medical centers was expanded
 - The Kyiv Medical Center additionally provided otolaryngology, orthopedics-traumatology, and ultrasound diagnostics
 - The Chernihiv Medical Center additionally provided endocrinology, neuropathology, and otolaryngology

KYIV

- 9,574 - number of services provided
- UAH 5,467,112.81 were received for services
- 1,863 patients signed declarations with primary care physicians (as of January 1, 2021)
- 3495 new clients of the medical center (i.e. they first applied to the medical center in 2020)
- UAH 609,415 were received from the state in the framework of the primary health care reform

CHERNIHIV

The medical center was opened in July 2020

- 1,414 - number of services provided
- UAH 650,264.96 were received for services
- 238 patients signed declarations with primary care physicians (as of January 1, 2021)
- 997 new clients of the medical center (i.e. they first applied to the medical center in 2020)
- UAH 22,387 were received from the state in the framework of the primary health care reform

The project of the "100% Life" Medical Center was developed with the financial support of international donors - the Global Fund to Fight AIDS, Tuberculosis, and Malaria, and Expertise France 5% Initiative. Modern medical equipment of the gynecological examination room of the Kyiv center was purchased with the assistance of the Olena Pinchuk Foundation.

POLTAVA

- 4,640 - number of services provided
- UAH 2,311,092.12 were received for services
- 491 patients signed declarations with primary care physicians (as of January 1, 2021)
- 332 new clients of the medical center (i.e. they first applied to the medical center in 2020)
- UAH 308,912 were received from the state in the framework of the primary health care reform

RIVNE

The medical center was opened in November 2020

- 140 - number of services provided
- UAH 102,150 were received for services
- 62 patients signed declarations with primary care physicians (as of January 1, 2021)
- 160 new clients of the medical center (i.e. they first applied to the medical center in 2020)
- UAH 2,232 were received from the state in the framework of the primary health care reform

Management "100 Life's"

THE NEW COORDINATION COUNCIL OF THE CO "100% LIFE" IS COMPOSED OF THE FOLLOWING MEMBERS:

1. Dmytro Sherembei, Chairperson of the Coordination Council
2. Serhii Dmytriiev, Policy and Advocacy Director
3. Yurii Lazarevych, Chairperson of the Charitable Organization "Network 100 Percent Life. Pivne"
4. Vitalii Tkachuk, Human Rights, Gender and Community Development Director
5. Alla Khodak, Chairperson of the CO "100 Percent Life. Odesa"
6. Nataliia Nahorna, Chairperson of the Charitable Foundation "100 Percent of Life. Zhytomyr Region"
7. Valeria Rachynska, Head of Human Rights, Gender and Community Development Team.

Dmytro Sherembei was elected as Chairperson of the Coordination Council following the general elections on September 3, 2020.

AN ETHICS COMMITTEE HAS BEEN FORMED

The Committee monitors how the organization's participants and employees abide by ethical norms and standards stipulated by the Code of Ethics and Professional Conduct. The Ethics Committee is composed of the following members:

1. Vadym Velyzhanin, Chairperson of the Committee and CO "100 Percent Life. Chernivtsi"
2. Alla Khodak, Chairperson of CO "100 Percent Life. Odesa"
3. Dmytro Tyhach, Chairperson of "Charitable Society 'All-Ukrainian Network of People Living with HIV/AIDS. Lviv'"
4. Yurii Lazarevych, Chairperson of CO "Network 100

Percent Life. Pivne"

5. Anzhela Moiseienko, Chairperson of CO "Chernihiv Network".

THE CODE OF ETHICS AND PROFESSIONAL CONDUCT OF THE CO "100% LIFE'S" EMPLOYEES AND MEMBERS WAS IMPLEMENTED

The Code determines basic ethical principles the organization's members and employees must comply with in the course of their duties and performance of activities.

The Code forms a single corporate culture and transmits the values of the organization to all its employees and members, which helps to maintain the integrity of the organization.

FOUR GENERAL MEETINGS OF THE CO "100% LIFE'S" MEMBERS WERE HELD

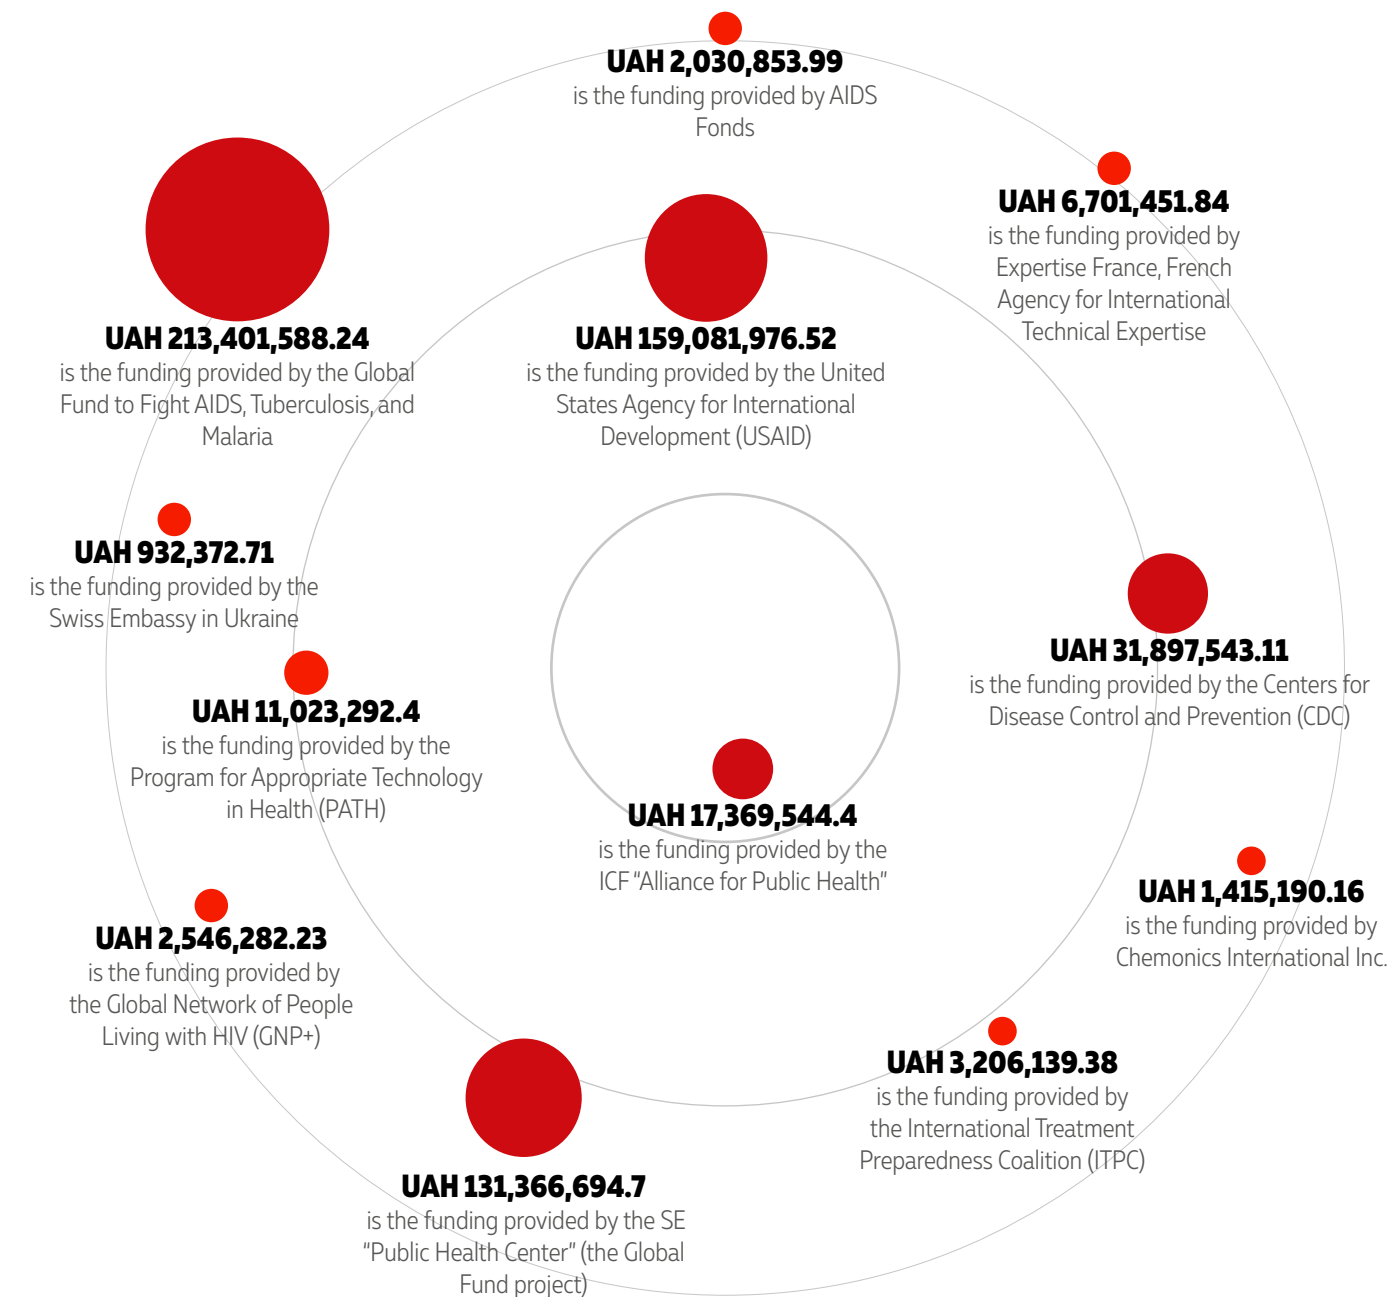

Quarantine restrictions did not affect the decision-making process of the "100% Life's" members. Thanks to the innovative application called "NGO Management", the organization successfully provides management online.

The application allowed making the decision-making process much faster, simpler, and more open: members of the organization participated in management regardless of location, as well as saw the results and history of decision-making.

New Initiatives, Resonant Collaborations and Events

"YOUR FAMILY DOCTOR" BRAND AND INFORMATION CAMPAIGN

"Your Family Doctor" Brand: This is a long-running social campaign to support healthcare reform and the family doctor institution, for establishing communication between doctors, patients, and the state.

The goal is to introduce a new health care culture to reduce the prevalence of dangerous infectious diseases in Ukraine.

The task of the "Your Family Doctor" brand is to return family doctors to the ranks of reform advocates, "establish relations" with them, assuming a part of their work in difficult times of change:

- Provide support
- Calm down and demonstrate understanding of problems
- Inspire to further work and cooperation with patients

Твій сімейний лікар

In 2020: THE ACTUAL COMMUNITY OF DOCTORS WAS INCREASED.

Every week, 5–9 publications were posted on social networks and messengers with the latest news and useful information for both the doctor and patient communities.

- Facebook: from 700 **to 7,700** subscriptions
- Viber: from 0 **to 3,000+**
- A sticker pack was created to stimulate friendly and modern interactions between doctors and patients.

Telegram:

Viber:

THE SOFT SKILLS OF DOCTORS WERE MADE SIGNIFICANT

A competency map of PHC physicians was created; it is the first such development in the healthcare field of Ukraine, which includes the interests of all stakeholders, takes into account key global health trends, and has the support of the Ministry of Health.

A soft-skills training course for PHC physicians was launched:

- 3 modules
- 11 lessons
- 16+ hours of training materials in video or audio format,
- 42 points CPB

Live experience, advice from colleagues, patient organizations, and leaders of PHC changes; practical tasks, techniques for daily use, materials for independent work and learning

A PRESS OFFICE WAS LAUNCHED AND MORE THAN 25 ARTICLES WERE PUBLISHED IN NATIONAL AND REGIONAL MEDIA

COMMUNICATION CAMPAIGNS WITH TOTAL COVERAGE OF MORE THAN 5,000,000 PEOPLE THROUGHOUT UKRAINE WERE DEVELOPED AND IMPLEMENTED

- A series of "Ask a Doctor" videos with doctor's answers to FAQ
- Advertising campaigns on social networks and banner advertising on relevant sites throughout Ukraine, the total coverage of 2 campaigns was more than 4,000,000 people
- Outdoor advertising: the coverage of 4,000,000 people throughout Ukraine

RESPONDING TO THE CHALLENGES ARISING FROM THE PANDEMIC

Without violating the quarantine restrictions, relevant content for television, print, and online publications were created.

- Advertising campaigns (outdoor and online) were launched
- Articles on COVID-19 from doctors were distributed in the media
- A series of video messages of doctors related to topical questions were recorded.
- 500+ subscribers on the Youtube channel of the project
- COVID-19 sticker pack:

THE BOOK TITLED "HIV. FAITH. TOLERANCE. HOPE"

"HIV: Faith, Tolerance, Hope": The first textbook on HIV/AIDS, comorbidities, and human rights in the modern world, intended for students of theological universities, including seminaries of the Orthodox Church of Ukraine.

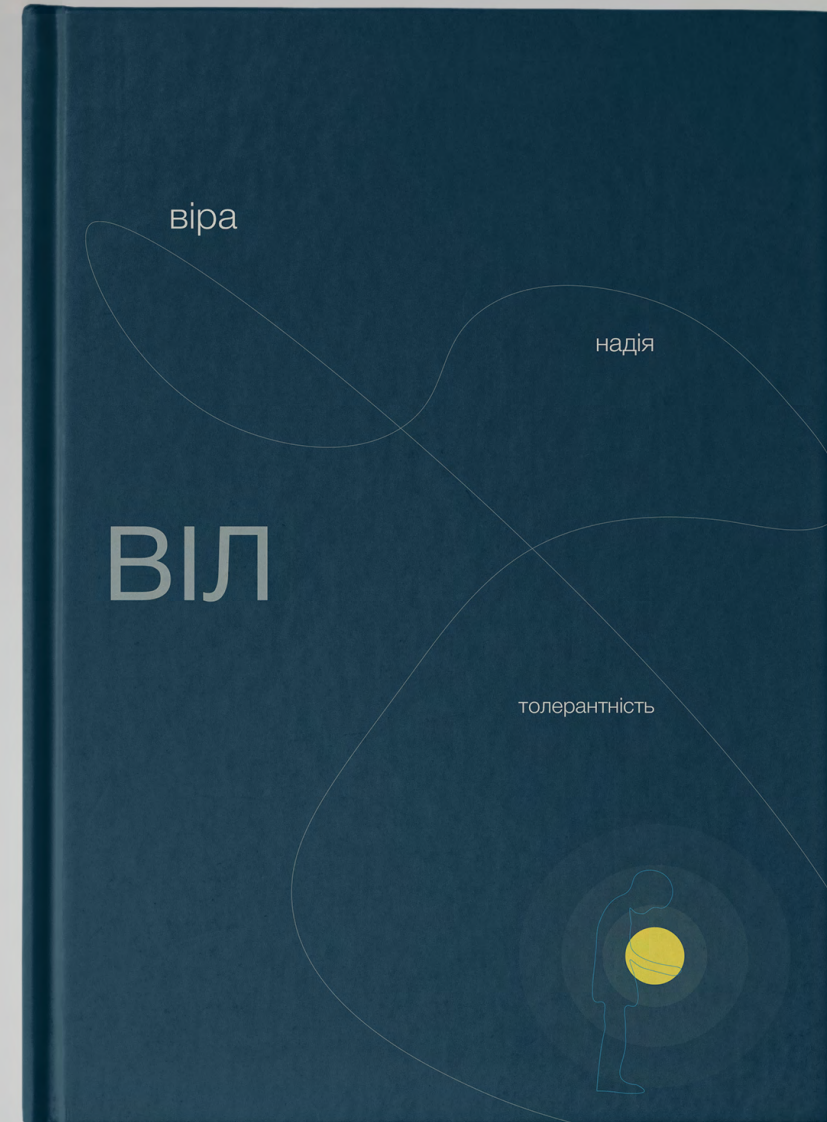

Representatives of both religious organizations and organizations of communities vulnerable to HIV, as well as healthcare professionals and psychologists were engaged in the creation of this textbook.

"Any disease cannot be a yardstick to evaluate people. Society must learn to accept everyone, regardless of their illness. It is not important where a person was infected. What is important are the treatment and help you can seek. The best medicine from religious organizations is tolerance, hope, and love. And we wanted all denominations and religious leaders to generously distribute these medicines to those who need them. In this way, the stigma and discrimination against HIV-positive people will be reduced by many times over."

Serhiy Dmitriev, Archpriest, Executive Secretary of the Commission on Social Service at the AUCCRO

#LIVEAIDS IS AN ONLINE CONCERT IN MEMORY OF AIDS VICTIMS

PIANOBOY plays **QUEEN** with love for a musical idol

For the International AIDS Memorial Day, CO "100% Life" initiated an online memorial LIVE AIDS concert – a tribute concert of QUEEN performed by PIANOBOY.

N.B.: In 1992, a concert in memory of Freddie Mercury and all AIDS victims was held at Wembley Stadium in London. Dozens of artists on stage and an audience of millions around the world honored the musician. Almost 30 years have passed since then, but HIV/AIDS continues to spread.

The title LIVE AIDS reminds everybody of the Live Aid charity music festival in London in 1985, where Freddie Mercury performed.

On May 17, 2020, on the International AIDS Memorial Day, Dmytro Shurov, together with his son Lev and sister Olha, played cover songs of QUEEN.

The broadcast took place on the Facebook page of CO "100% Life".

8 cover hit songs of QUEEN

HIV activists, representatives of the UN family, and international partners went live during performances.

The recorded concert was also posted on the official YouTube channels of "100% Life" and the PIANOBOY band.

In support of the concert and for Memorial Day, following the hashtag #LiveAIDS, a flash mob was held on social networks with stories of people living with HIV 100%.

Due to the COVID-19 pandemic, the action dedicated to Memorial Day took place online for the first time in the history of "100% Life"

150,000

views of the broadcast on Facebook

GLOBAL SOLIDARITY, SHARED RESPONSIBILITY - MOBILIZATION OF HIV+ COMMUNITY BY DECEMBER 1

UNAIDS (Joint United Nations Program on HIV/AIDS) called the theme of World AIDS Day – “Global Solidarity, Shared Responsibility”.

On December 1, “100% Life” brought partners together to encourage everyone to be aware of their health and contribute to a healthier world.

Activists from all regions of Ukraine together with partners and donors recorded an inspiring video about the fight against HIV and for the sake of life.

The advertising campaign took place on Facebook and YouTube from the 1st to the 14th of December.

Youtube

CAMPAIGN FOR THE INTERNATIONAL HIV AND VIRAL HEPATITIS TESTING WEEK

In 2020, CO "100% Life" became a partner of Coalition PLUS, the international network of NGOs involved in the fight against HIV and viral hepatitis. It is the largest francophone coalition operating in 50 countries and uniting about 100 organizations.

From November 23 to 29, Ukraine joined the first International Testing Week launched by Coalition PLUS. CO "100% Life" became the provider of the testing week in Ukraine.

For the testing week, an animated video clip was created and a promotional campaign was launched on Youtube, Facebook, and Instagram.

The idea of the video clip was to show the positive side of testing - "Test yourself. That is better".

Even if the test is positive, thanks to HIV therapy, you can live a full life, and hepatitis is curable in more than 90% of cases.

The video was made in light colors, close to the identity of the Testing Week.

The video clip linked the viewer to the prozdorovia.in.ua, where he or she was able to order an oral HIV test at home or find the nearest testing point in a city.

Promotion tactics

Showing a series of 30 and 6 seconds on Youtube and Facebook & Instagram. The long version showed a full story and the short one caught up with the viewer and reminded them of what they had seen.

Showing a series allowed giving information in several stages. The viewer was able to see each subsequent announcement only after viewing the previous one.

The goal was to reach the audience and provide traffic to the section "I Want to be Tested" on prozdorovia.in.ua.

78%

During its period, the campaign generated of all views on the "I Want to be Tested" page

2,668,897

views on Youtube

9,089

The main key performance indicator means clicks. The campaign managed to receive clicks, which was 14% more than planned.

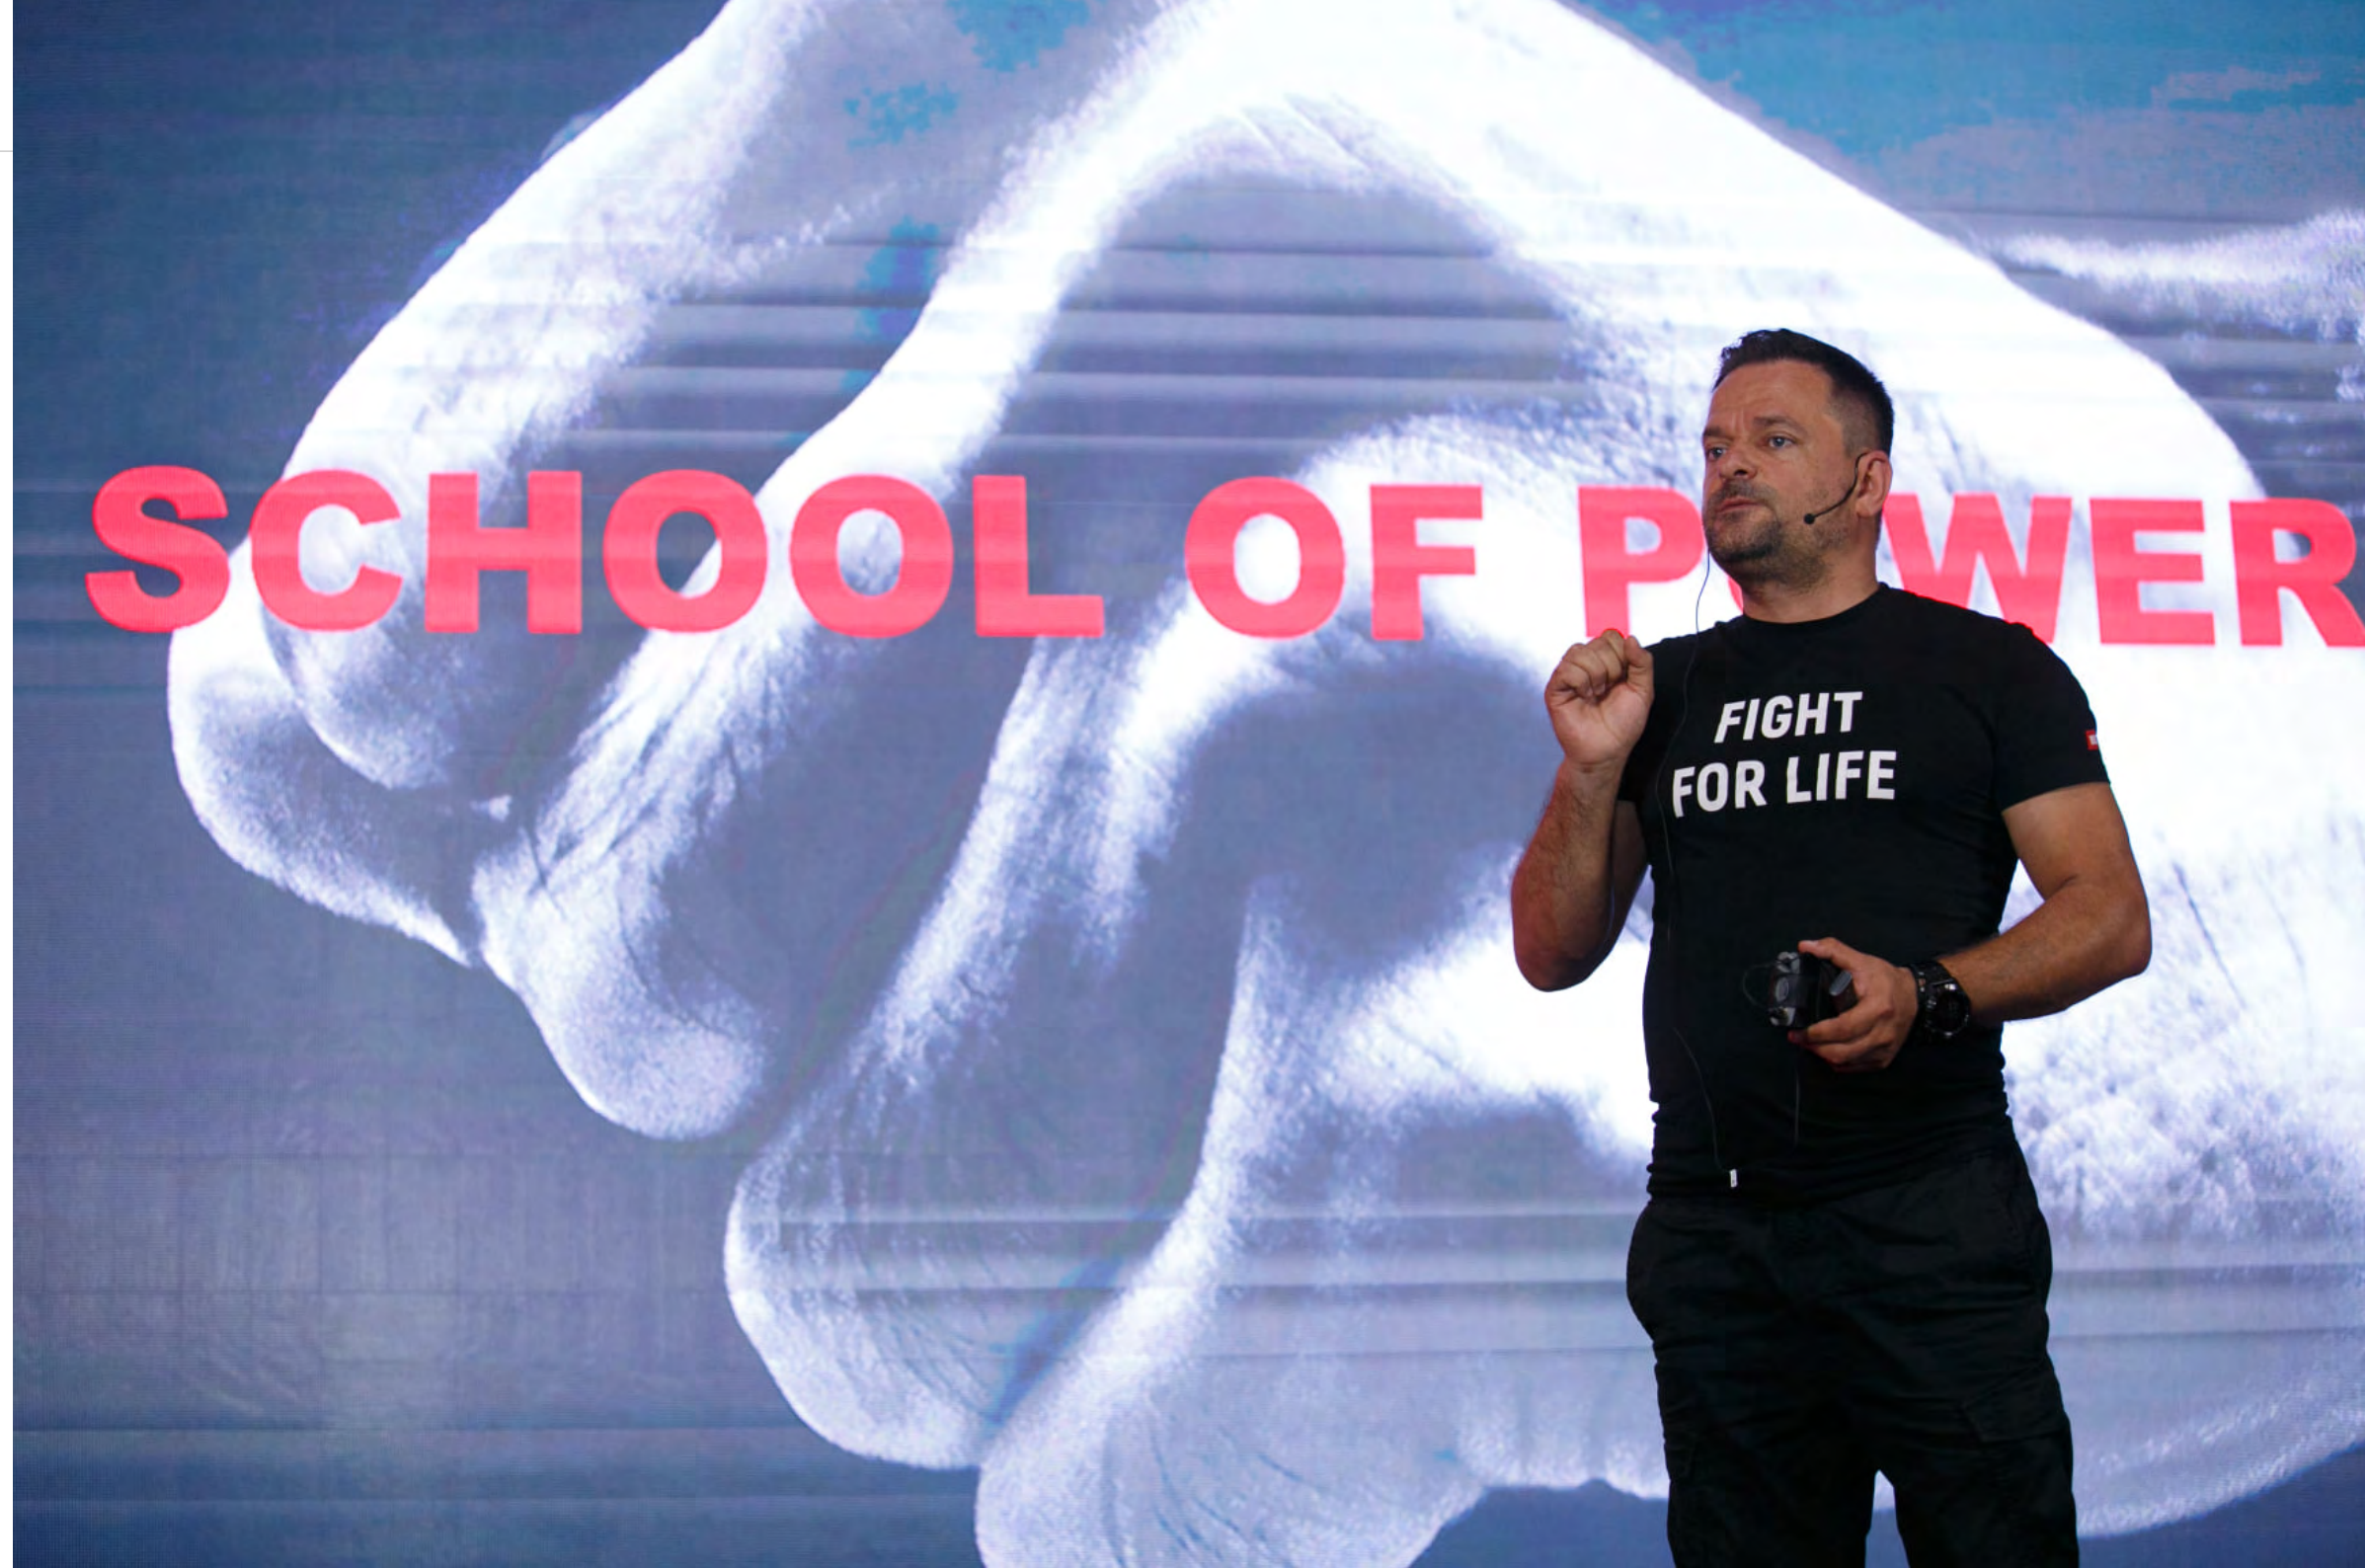

SCHOOL OF POWER

A new format for involving communities in public health decision-making in Ukraine

In 2020, CO "100% Life" initiated a new format for training representatives of key communities.

- To effectively implement global health approaches in Ukraine, advocate for community interests, taking into account their opinion, "100% Life" developed a training format – The School of Power.
- More than 150 activists, both offline and online, from the 9 most HIV-vulnerable communities were able to attend the School and learn about power, healthcare lobbying, as well as how to change the country and better advocate for patients' rights.
- Both current and former representatives of the highest executive and legislative bodies were invited as speakers and mentors: deputies of the Verkhovna Rada of Ukraine, members of the Cabinet of Ministers, representatives of the highest judicial, executive, and legislative branches, the best-known activists, change agents, and opinion leaders.
- The School of Power had two stages in September and November 2020.
- As a result, a cohort of activists was formed from among the communities who understand the architecture of the state system, decision-making, and levers of advocacy of patients' interests.

FIGHT FOR LOVE – FASHION THAT SAVES LIVES

725 rapid multi-tests for HIV, hepatitis, and syphilis were purchased from funds received from the For Love collection.

The collection was the result of the joint creative work of CO "100% Life", designer Ivan Frolov, and masters of the SOVA Jewelry House.

It was presented in 2019 at Ukrainian Fashion Week.

Jewelry was sold in online stores and all corners of the SOVA brand. A part of the revenue was used to combat the HIV/AIDS epidemic in Ukraine – procurement of rapid testing systems which allowed for timely diagnose of HIV and start treatment.

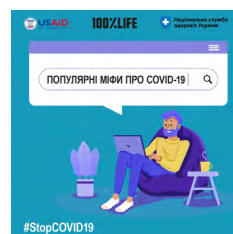

In 2020, the authors of the collaboration decided to expand the collection.

Since the collection sale began, CO "100% Life" purchased about **2,000** rapid HIV tests for funds received.

COMMUNICATION SUPPORT OF THE MOH, NHSU, AND PHC DURING THE COVID-19 PANDEMIC

The beginning of the pandemic in Ukraine coincided with the start of the second stage of healthcare reform, which created difficult conditions for effective communication regarding both the course of COVID-19 in Ukraine and the processes related to the transformation of the healthcare industry. CO "100% Life" with the assistance of the United States Agency for International Development (USAID) within the HealthLink project provided support to government agencies to improve the overall communication capacity of the NHSU, PHC, and MOH of Ukraine.

SUPPORT OF THE NHSU'S AND PHC'S SOCIAL NETWORKS

Facebook "NHSU for the Patient"

June-August 2020

- The number of subscribers tripled
- Publications received more than 63,000 interactions
- Record coverage - more than 1 million in August. This is 11 times more than in May
- A new visual design of community was developed
- The NHSU for the Patient page became a feedback platform
- Received doctors and patients who became advocates of the reform

Facebook "Public Health Center"

June-August 2020

- The number of page subscribers increased by 33%
- Infographics were adapted and developed

PROMOTIONAL CAMPAIGN VIA THE NHSU'S YOUTUBE CHANNEL

Three animated video clips were created:

- What to do if you contact a person who has been diagnosed with coronavirus?
- Changes in medicine
- What is a healthcare guarantee program?

TECHNICAL MODERNIZATION OF NHSU' AND PHC'S ONLINE PLATFORMS

- Updating the COVID-19 section on the NHSU's website
- SEO-audit and optimization of NHSU's and PHC's websites
- Content creation (translation and adaptation of materials about COVID-19, rewriting, and infographics)
- Optimization of NHSU's and PHC's Youtube channels
- A series of "Ask a Doctor" online videos - more than 30 video clips in collaboration with "Your Family Doctor"
- Daily media monitoring was provided for the PHC

THE STRATEGIC AND EXPERT SUPPORT FOR GOVERNMENT AGENCIES

- The communication strategy was developed for the NHSU considering COVID-19-related challenges in terms of anti-crisis communications
- Training for the NHSU speakers
- A series of training courses on effective communication during COVID-19 for the MOH staff

3,424,994

total impressions in August

MEDIA PROJECTS IN PARTNERSHIP WITH THE NHSU

Breakfast with 1 + 1 Special section "ABOUT HEALTH"

Radio NV The special project titled "How Healthcare Reform Works"

9 programs
447,000 listeners of the radio
More than 400,000 Facebook users

LIGA.net The special project titled "Health of Ukrainian Medicine: Examination"

8 special topics
More than 698,836 readers

DIRECT ACTION EVENTS

Despite the quarantine restrictions, together with CF "Patients of Ukraine" and other partner non-governmental organizations, 4 direct actions were held to protect the patient's rights to have access to quality health care.

Protest action "Gnawed Bones for Health Workers and Patients: Cabinet of Ministers, Stop Cutting the Budget for Medicine" demanded to increase the budget for health care for 2021.

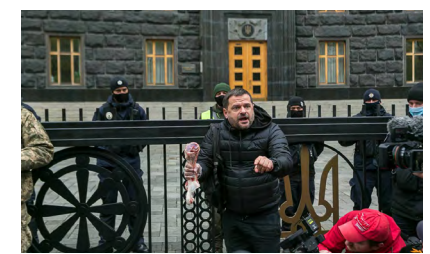

The action "Sovok Kills Healthcare Reform" defended healthcare reform and implemented transformation plans (July 23, 2020).

The action "The Ministry of Treatment with Asphalt" opposed the redistribution of budget funds from medicine to road repairing.

The action "Death Budget-2021" demanded to increase health care funding in 2021 from the State Budget to 5% of GDP.

Representation of CO "100% Life" in international events and structures

- Presentation of the CO "100% Life" experience at the 23rd International AIDS Conference (AIDS 2020)
- Presentation of the CO "100% Life" experience at the international conference HIV2020
- Presentation of the CO "100% Life" experience at the Conference on Retroviruses and Opportunistic Infections (CROI 2020)
- Presentation of the CO "100% Life" experience at the 51st World Conference on Lung Health of the International Union Against Tuberculosis and Lung Disease (The Union 2020).
- CO "100% Life" represented the European Region in the Delegation of Non-Governmental Organizations at the UNAIDS Program Coordinating Board
- A representative of CO "100% Life" became a member of the governing bodies of the Global Network of People Living with HIV (GNP+)
- CO "100% Life" joined Coalition PLUS as an observer
- CO "100% Life" was accepted as a member of the International Drug Policy Consortium
- Representatives of CO "100% Life" joined the working groups of the Global Partnership For Action to Eliminate all Forms of HIV-related Stigma and Discrimination.
