

CHARITABLE ORGANIZATION
"ALL-UKRAINIAN NETWORK OF PLWH"

Appeal to the United Nations Security Council from patient and public organizations in Ukraine and around the world

Today we are not divided into people living with HIV, tuberculosis, hepatitis, orphan or oncological diseases and ordinary people, today we have no competing political parties, there is no difference in what language we speak - we are Ukrainians. And we're not talking to WHO or UNAIDS. This letter is not to the Global Fund to Fight AIDS, Tuberculosis and Malaria or UNICEF. This letter is to everyone in the civilized world.

We are being shot at with missiles, tanks, cannons - all existing types of weapons, the civilian population is dying. And this is happening in the very heart of Europe.

We demand: stop the war that the Russian Federation has treacherously unleashed.

Everything that happens will lead to a humanitarian catastrophe as well as wide-ranging consequences, including radiation and other problems, then it will spread not only in Ukraine but in the whole of Europe. We urge you to act now to stop Russian aggression before it's too late. Whichever way you can, and urgently! Tomorrow or even in an hour may be too late. Take action! Stop this war!

List of Ukrainian people's demands to international community.
